Stallion Information

february 2022

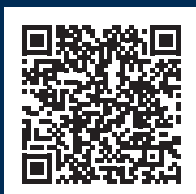

Stallion information 2022

We provide the Stallion information 2022 as a tool to help with stallion choices. Opting for the best-quality stallions when choosing a stallion is not the only key factor to be considered, making correct pairings is even more important. The KFPS strives to provide as many data as possible about hereditary aspects of stallions.

The new layout

The layout of this Stallion information has been renewed.

All the information about the concerned stallion has been brought together in one clear overview. The list with totals can be found on the website under breeding → Totals studbook stallions.

Which stallions?

The 2022 edition lists all active stallions. When looking at breeding values for exterior it must be taken into account that the data of young stallions does not include information of their offspring. These breeding values are based on lineage information and exterior assessment (linear scores) of the stallion itself. For stallions that have completed progeny testing the breeding values are almost completely based on inspection data (linear scores) and ABFP data of offspring. The reliability of breeding values for young stallions is still low. This means that their breeding values are more likely to change (when more offspring are inspected or tested) than in the case of older stallions with a high reliability index. Because of this lower reliability of breeding values for young stallions, these are based on a more reserved estimate and are therefore closer to the breed average (100).

Which characteristics?

The following characteristics of stallions are listed:

1. Breeding value (linear) exterior characteristics
2. Breeding value for movement/sport aptitude (based on aptitude tests)
3. Breeding values for character
4. Breeding values for sport (based on competitive sport)

Breeding values exterior and sport aptitude

Considering the complexity of breeding value estimates for exterior characteristics and sport aptitude, it is necessary to provide an explanation about how these figures should be interpreted and how they are compiled. The explanation also pays attention to how these figures can be used for stallion choices.

Linear exterior characteristics

The breeding values for the exterior characteristics are based on

the linear scores, which have been recorded at the moment of acceptance of horses in the Studbook since 1993. Scores ranging between 5 and 45 are recorded for 25 exterior characteristics, with the average being 25. In the case of linear characteristics we are strictly dealing with observations, and not evaluations. The choice of characteristics is such that the linear report provides a picture of the horse's exterior that is as complete as possible. The linear characteristics are divided into two entities: Optimum characteristics: characteristics with the average score (25) or breeding value (100) being the most favourable. Examples of such characteristics are: back conformation and hind leg conformation.

Maximum characteristics: characteristics based on the principle of the higher the score the better (e.g. expression of the head, movement expression etc.) or characteristics where the optimum clearly lies above the average, like neck conformation and shape of the hoof. The difference is made visually visible because the breeding values for maximum traits are shown in dark blue bars (favorable) and red bars (unfavourable) and breeding values for optimum traits in light blue bars. In addition to the 25 linear features, the overview consists of a measured feature, the height.

The appreciative exterior features

In addition to the 25 linear exterior characteristics, scoring is also done for 3 rating characteristics: breeding type, conformation and legwork. Whereas linear characteristics are mere descriptions, the rating characteristics are evaluative. For the assessment of the rating exterior characteristics the related linear characteristics play an important role. The rating characteristics are scored within the range of 4 to 9. Since 2016 the marks for rating characteristics that are scored in the context of upgrading are also included in the breeding value estimate. Additionally, since 2017 the lower bar figures scored in the classes for Star mares are also included in the breeding value estimate.

Movement and sport aptitude

The breeding values for the movement characteristics walk, trot and canter are computed on the basis of the scores for walk and trot in the exterior inspection and the scores for walk, trot and canter from the aptitude tests (ABFP and IBOP). The higher the number of offspring whose information is collected from the aptitude tests, the smaller the influence of in-hand movement will be for breeding values. In case of large numbers of offspring and the information derived from their aptitude tests, the

influence of in-hand movement even becomes virtually zero. The reason for this being that movement in the aptitude tests (under saddle and in harness) is closer to the breeding goal than in-hand movement.

Character

Breeding values for character are included since the 2020 edition. This information stems from the twenty offspring in the ABFP Tests that are scored on character by the rider team. The published character/personality characteristics are: reliability/predictability; trainability; willingness to work and stamina.

Sports (competitive sports)

Since the 2022 edition the breeding values for sport accomplishments will be taken in account for the first time. The information is provided by the KNHS and lists the highest known scores for Dressage and Driving Dressage. The reliability is still low and the degree of heredity small. For the future the intention is to also add the international sport data from the Sport Federation FEI and the results in showdriving sports.

Estimation model

The breeding values, estimated by CRV, are estimated with a so-called estimation model. The estimation model indicates which factors that influence the differences between (in this case) stallions are subjected to corrections. The exterior scores are corrected for the following effects: Breeding value of the offspring's dam, age at the moment of inspection, gender; Jury member and inspection. This correction is carried out in order to produce the clearest picture possible of the degree in which the differences between batches of offspring are caused by a difference in genetic aptitude of the stallions. Because of these corrective factors it basically does not matter if one stallion is paired to higher-quality mares than others. The type of estimation model used is the so-called animal model. Along with data of offspring, animal models also include information of relatives. The contribution of this information decreases as the available information of offspring rises.

Interpretation of breeding values

points on either side. This basis was fixed at 2001. The average breeding values of all horses born in 2001 was fixed at 100 for every characteristic and the range (standard deviation) of these breeding values was fixed at 4. Breeding values with a deviation from 100 of one time the range (between 96 and 104) have to be considered as being average. Over 2/3 of the breeding values is found in this area. It is self-evident that the larger the deviation from 100, the bigger the expected effect will be. A stallion with a breeding value of 109 or higher for say, movement expression, ranks with the best 2% of stallions in the population. With a breeding value higher than 112 this is 0.1%. The breeding

values for total-exterior and total-movement are the average of the underlying characteristics (breeding type, conformation and legwork respectively walk, trot and canter), multiplied by 1.25 in order to achieve a range of 4 for the totalbreeding values.

Description of breeding values

The breeding values are depicted by 'bars' per individual characteristic. As pointed out, the maximum characteristics are printed with dark-blue (favourable) and red (unfavourable) and optimum characteristics with light-blue bars. For optimum characteristics, (extreme) deflections to the left or right represent an unfavourable picture, 100 is the optimum. Summarising: bars to the left are usually unfavourable and bars to the right are favourable, except for the light-blue bars.

Reliability

The degree in which the breeding value gives an accurate picture of the true genetic aptitude of a stallion is expressed in the reliability (btbh.). The reliability is chiefly influenced by the number of inspected offspring. Breeding values with a low reliability can still change considerably when more offspring are inspected. The reliability can be interpreted as follows:

btbh.	interpretation
< 70%	moderate reliability
70-80%	reasonable reliability
80-90%	good reliability
>90%	very good reliability

The reliability for every breeding value has to be 30% or more to be considered for publication.

Use of breeding values

The breeding values for exterior are an excellent tool for making the right pairing combination. The way to do this is by checking the mare's linear score form for points that have to be corrected. If the characteristic that needs to be improved is a maximum characteristic then a stallion must be selected who has a (distinctly) positive hereditary image for passing on this characteristic (bar to the right). If it is an optimum characteristic then the best choice would be a stallion with a (light) deviation in the opposite direction, depending on the mare's score. Use of breeding values for sport aptitude. As you can see there are estimates for breeding values of basic gaits in the exterior bar and in the sport aptitude bar. The first is based on the assessment of basic gaits in the inspection ring (in-hand), whereas the second is based on the assessment of basic gaits in use (ABFP Test). For most stallions these breeding values largely overlap. There are however, stallions whose breeding value for basic gaits in the sport index is a fair bit lower than the breeding value for basic gaits in the exterior bar. As the breeding goal stimulates

the breeding of horses with good basic gaits in use, the breeding values for sport aptitude should carry more weight in your valuation of stallions.

Kinship percentage

Studbook stallions are given a kinship percentage. This figure states the relatedness of the stallion with the population. The lower this figure, the bigger such a stallion's contribution to variation in bloodlines can be. The average percentage of Studbook stallions lies around 17.8%. The kinship percentage is computed by calculating the inbreeding of fictitious foals from combinations of all individual stallions with the mare population. The mare population being defined as all filly foals born in the past three years, in total over 8000 animals. For the inbreeding calculation all known generations are included (so not just the first five generations). The kinship percentage is influenced by the degree in which the bloodlines match, or deviate from the population. When a stallion is used more often the kinship percentage will increase. The kinship percentage is one of the characteristics that are taken into account for the young stallion selection, with the aim to limit the increase in inbreeding. This edition is the first in which corrections are applied for missing pedigree information in the calculation of kinship percentages. This is the reason why the kinship percentage for stallions with a 'shortdam line' has been revised upwards.

Preference Points

The number of points for preferent status is also stated for each stallion in this Stallion Information. The preference status is a sum of points that the offspring of the stallion receive when they have received a predicate. There are weighting factors for each predicate. For example, a Star counts for 1 point and a studbook stallion that is approved on progeny contributes 50 points. The total of these points are stated with the stallions, however the rule of thumb that 1000 points yields the Preferent

predicate no longer applies. For studbook stallions with at least 700 offspring aged at least three years and older, a ratio is also calculated and published annually. This ratio indicates whether a stallion performs exceptionally compared to other stallions in that year. The average ratio over a number of years determines whether a stallion can become Preferent. For more information about the preference points: www.kfps.nl → The KFPS → rules and regulations → registration regulations.

Total Index

A Total Index is being calculated since 2020. The aim of this Total Index is to make a ranking of stallions and mares on the basis of quality. In this Total Index, exterior and movement/sport aptitude are weighed in with the ratio 40:60. Additionally, the kinship is weighed in in such a way that selection based on the Total Index does not lead to an increase in inbreeding. The intention is to add breeding values for character, sport, life expectancy, etc. to the Total Index in the future.

Stallion information on the website

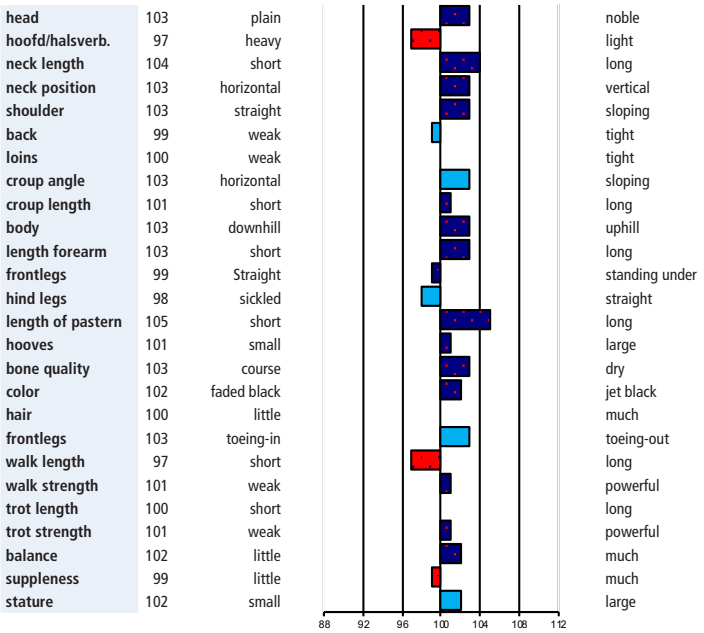

On the KFPS website (www.kfps.nl) information about stallions can be found under Information on breeding and via MyKFPS. By stating selection criteria it is also possible to make selections in stallions.

Foal reports 2022

What do the foals of Bastiaan 510, Wibout 511, Waander 512, Wolter 513, Auwert 514, Arent 515 and Boet 516 look like? Every year people are eagerly looking forward to the first crop of foals from the latest collection of stud stallions. In the past inspection season the KFPS Jury members have seen many of them. They have compiled an analysis than can be quite helpful for making stallion choices. In the past inspection season seven stallions presented their first crop of offspring. One or a few foals at inspection do not provide a clear picture of a sire's breeding profile. But all findings of the inspections brought together do start to give a good insight into a stallion's breeding qualities. The KFPS Jury members give a brief description of what they have seen.

Bastiaan 510 (Jisse 433 x Tsjerk 328)

Only twelve Bastiaan 510 foals have been inspected and this must be factored in for the interpretation of the report. The well-developed foals are longlined with average length of legs and often have a downhill body frame. It is a fairly uniform batch of foals. The foals have satisfactory breeding type. Expressiveness of the heads is satisfactory. The head-neck connection is average. The necks have good length and score average on conformation. Stance of the shoulder is usually good. Many have a weak back but most have satisfactory connection to the loin section, some have weak loins. The croups have satisfactory length, usually with sloping conformation. Foreleg conformation is correct. Sickleshocked hind legs occur quite frequently. The legwork is very hardy. The walk shows satisfactory length of stride and more than satisfactory power. The trot has scope but should demonstrate more power. The foals trot with satisfactory suppleness. The foals need to develop more elevation. The hind leg should be placed further forward under the body.

Wibout 511 (Thorben 466 x Doeke 287)

The twenty-eight Wibout 511 foals have developed generously, they are longlined, have satisfactory high-legged quality and many have a downward build. This batch of foals shows little uniformity. The foals have satisfactory breeding type. Expression of the heads is variable. Many of them have a heavy head-neck connection. The necks have good length and vary in conformation. Shoulder conformation is mostly good. Back and loin section could be stronger. The croups score average on conformation and need more length. There is a lot of variation in stance of the forelegs, toeing-in as well as toeing-out occurs. Many have sickleshocked hind legs. The legwork radiates more than satisfactory dry quality. The walk varies in length of stride and in most cases shows satisfactory power. The trot too presents a variable picture. Many of them need to develop more scope and power in trot. The foals have satisfactory posture and suppleness. The hind leg should be placed further forward under the body.

Waander 512

(Loadewyk 431 x Beart 411)

The thirty inspected Waander 512 foals show satisfactory to good development and satisfactory longlined and high-legged quality. There is much variation in terms of body shape. Because of their generous forehands the foals radiate lots of breeding type. Their heads are noble. The necks have lots of length and vertical stance. There is also much variation in the head-neck connections. Shoulder conformation is sloping. Many have a weak back but most have satisfactory connection to the loin section, some have weak loins. The croups score average on conformation and have more than satisfactory length. Stance of the foreleg is usually correct. In many cases the hind leg is sickle-hocked, sometimes even very sickle-hocked. The legwork shows great hardiness. The walk varies in length of stride and power. The trot is mostly ground-covering and powerful. In trot the foals have uphill body posture and more than satisfactory suppleness. The hind leg should be placed further forward under the body.

Wolter 513

(Fabe 348 x Karst 362)

The only five Wolter 513 foals that have been inspected is not enough for a reliable report. The description that follows therefore only provides a tentative picture. The five Wolter 513 foals that have been inspected have satisfactory development and more than satisfactory longlined quality, most of them are high-legged with satisfactory uphill body shape. The foals have satisfactory breeding type. We see noble heads and heads that are coarse. The necks have satisfactory length and vertical stance is satisfactory too. Shoulder conformation is good. They have satisfactory strength in the back but they should have a stronger loin section. The croups have average length and in most cases are slightly sloping. Quality of the legwork has satisfactory correctness, sometimes toeing-in occurs. Many have sickle-hocked hind legs. The legwork shows great hardiness. The walk shows satisfactory length of stride and average power. Scope in trot is satisfactory but needs more power. Body posture is satisfactory with more than satisfactory suppleness. The hind leg should be placed further forward under the body.

Auwert 514

(Jehannes 484 x Andries 415)

The seventy inspected Auwert 514 foals have a classy appearance and generous forehands. The foals are well-developed and longlined. They are generally high-legged foals with satisfactory uphill body shape. They display good breeding type, have expressive heads, the necks are long and are vertical. Occasionally we see

an upside-down/under neck. In general, shoulder conformation is good. Back conformation is variable. Strength of the loin section is satisfactory. The croups mostly have satisfactory length and generally, are slightly sloping. Stance of the foreleg is usually correct. Stance of the hind legs is usually correct but in roughly one third of the foals the hind leg is sickle-hocked. The legwork shows great hardiness. In most cases the walk shows more than satisfactory power but varies in length of stride. The trot has scope but is variable in power. The foals have satisfactory uphill body posture and more than satisfactory suppleness. Placing the hind leg forward under the body is satisfactory.

Arent 515

(Jouwe 485 x Haitse 425)

The twenty-seven Arent 515 foals that have been inspected show satisfactory to more than satisfactory development, they have satisfactory longlined- and high-legged quality and display a variable picture in terms of body shape. The foals have satisfactory breeding type. The foals have expressive heads. The head-neck connection is mostly heavy. The necks have satisfactory length and score average on direction of the neck. Slope in the shoulders is satisfactory. Most have a strong back and loin section, slightly weak backs occur too. The croups have satisfactory conformation but in many cases need more length. Stance of the foreleg is usually correct. Many have sickle-hocked hind legs. The legwork has more than satisfactory dry quality. The walk varies in length of stride and scores average on power. The trot has satisfactory scope and is usually powerful with more than satisfactory body posture. The foals have satisfactory suppleness and the hind leg should be placed further forward under the body.

Boet 516

(Jouwe 485 x Uldrik 457)

The twenty-five Boet 516 foals that have been inspected are generously developed, they are high-legged and longlined foals with good body shape. These are foals with striking breeding type and expressive heads. Most of them have a light head-neck connection. The necks are mostly long with vertical stance. Occasionally a heavy neck occurs. Shoulder conformation is generally sloping. Quite a few need more strength in the back. The loins are usually strong and well-connected. The croups have length and usually have sloping conformation. Stance of the foreleg is generally correct, occasionally toeing-out occurs. Half of the foals have a sickle-hocked hind leg. The legwork radiates more than satisfactory dry quality. The walk varies in length of stride and shows satisfactory power. Scope in trot is mostly satisfactory, in terms of power there is quite a lot of variety. The foals have great posture with satisfactory suppleness. In many of them the hind leg should be placed further forward under the body.

Martzen 521

Stallion Information

november 2021

Studbookname: Marten fan StarKing Ster Sport-Elite AA (201200259) **Pedigree:** Dries 421 x Ster*3 Abe 346 x Ster*3 Nykle 309 x Ster pref*S Teake 273 x Ster*3 Cobus 248 x Model*I Ritske 202 **Date of birth:** 7 maart 2012 **Height at withers:** 1.69 meter **Pedigree:** 94 **Kinship:** 17.2% (average in 2021: 17,8%)

Exterior:

Breeding type: Martzen 521 has great breeding type thanks to his noble head, generous feathers, vertical neck with favourable muscling along the crest of the neck and his elegant outline. He has a straight crest.

Conformation: The 9-year-old Martzen 521 radiates youth and presents a good-looking silhouette. The stallion has a proportionate build, has satisfactory longlined and high-legged quality and satisfactory horizontal body shape. He has a strong back and strength of the loin section is satisfactory, croup conformation is good but needs more length.

Legwork: Dry quality of the legwork is satisfactory. Foreleg conformation is correct. The hind leg has the desired angle in the hock. Stance of the off (right) hind leg is a little toeing out.

DNA-tests:

Hydrocephaly: non carrier

Roaring: no observations

Short Test:

Martzen 521 was allowed to join the Short Test on the basis of his performances in the sport.

This took place in Exloo from October the 29th through to and including November the 13th 2021 and was successfully completed by the stallion.

Stable manners:

Martzen 521 showed himself to be a pleasant, calm and relaxed stallion in the yard and in daily contact manners. No (stable) vices were found.

Mentality during work:

The stallion was appreciated for his willingness to work and trainability, he is very responsive to the aids.

Sport aptitude:

Martzen 521 is active in the Light Tour, ZZ driving and takes part in showdriving Limit Classes.

IBOP: In 2020 the stallion completed an IBOP with a total score of 80 points (AA) Walk 6 / Trot 7.5 / Canter 7.5 / Posture & Balance 8 / Suppleness 7.5 / Transitions 7 / Impulsionion 7.5.

Assessment by guest rider: Martzen 521 appears Energetic and active and can be ridden correctly into the contact from back to front. Especially in the beginning the contact was not quite as still and constant as it should be. In trot the stallion is active, showing correct head-neck posture and with the nose on the vertical. In shoulder-in the stallion moves with good rhythm and Impulsionion as well as good bend through the body and gives good reactions to the aids. In half pass in trot the stallion demonstrates he is well able to start the exercise with ease and is also able to finish it while still reacting to the aids. Crossing of the legs in half pass is good but moving sideways should be done a little sharper. In the pirouettes the stallion shows good bend through the

body and a well-engaged hind leg with good balance.

When riding tempi changes the stallion still struggles a bit to jump the canter changes promptly on the aid of the rider while keeping a closed outline. The stallion shows to have potential for passage in which he keeps his balance with a well-engaged hind leg in a fine uphill frame. In the transition from walk to piaffe the stallion must move smaller, more actively and with more collection.

Walk: The stallion walks diligently and actively with satisfactory scope and displays good extension in walk while keeping the rhythm.

Trot: The stallion demonstrates very good rhythm and Impulsionion, he maintains the rhythm in the separate exercises, rises in the withers when extending, is good at transitions, always gets nicely back on the hind leg and shows fine use of the foreleg.

Canter: The stallion possesses a powerful canter, good strides and Impulsionion and shows to be well able to make transitions within the pace and to get back on the hind leg.

Dam report:

Stallion Martzen 521 stems from the relatively small and little-known dam line 94 whose foundation dam is the B-Book mare Arendje. Lineage: Dries 421 x Star*3 Abe 346 x Star*3 Nykle 309 x Star Pref*5 Teake 273. Although Dries 421 is closely related to the population via for instance Jasper 366, the stallions on Martzen 521's maternal side are not, which results in a relatively low kinship percentage of 17.2%. Martzen 521's dam has a kinship percentage of 16.0, the granddam 16.3.

Dam Rebecca Marja H. Star (1997) died at the age of 23. As a 4-year-old she became Star with a second premium. Her height at withers was 1.60 m. She has twelve registered offspring and seven of them were inspected as adult horses. From these, two daughters and one son (Martzen 521) became Star and three daughters were declared Studbook. The

granddam (height at withers 1.59 m) has eleven offspring and six of these were inspected as adult horses.

From these three daughters are Star and three are Studbook.

A remarkable number of offspring in the dam line have competed in the sport. Martzen 521 is active in the Light Tour, ZZ driving and takes part in showdriving Limit Classes. Four of the dam's offspring are active in the sport (B to M2). A daughter of the granddam (half sister of the dam) has produced the first-premium Star gelding Tseard fan de Gravinnehoeve Star Sport Elite (Wisse 408) who competed in the Heavy Tour and ZZ driving. The 3rd dam has nine offspring who competed in the sport (B to M). The dam completed a mediocre ABFP Test in 2000 but did earn a 7 for willingness to work.

Both dam and granddam have an acceptable white marking (tiny star). Dries 421 has a white percentage of: acceptable 0.6% and unacceptable 0.3%. Eleven of the dam's offspring have no markings and one offspring has an unacceptable marking. So except for Martzen 521's dam, the granddam's offspring don't have unacceptable markings.

Final conclusion:

Martzen 521 displays sustainability in conformation and movement. He can contribute to the breeding of the Friesian horse because of his relatively low kinship of 17.2%, his above-average breed expression, his correct basic gaits and his excellent character/mentality. On the basis of the above data the stallion Martzen fan StarKing Star Sport Elite AA is registered in the Studbook for stallions under the name of Martzen 521.

Advice:

Martzen 521 is expected to improve breed expression, character, capacity for transitions, mentality/willingness to work and trainability and can contribute to outcrossing. He can be used for longlined mares with satisfactory height at withers and good-quality legwork.

Studbook name: Aizo fan Twillens Ster AAA (201602890) **Lineage:** Haike 482 x Ster*IAA Wylster 463 x Ster*I Jasper 366 x Ster Pref*4 Oege 267 x Model Pref Prest*6 Tamme 276 x Ster Pref Prest*7 Hearke 254 **Date of birth:** 30 juni 2016 **Height at withers:** 1.70 meter **Pedigree:** 8 **Kinship:** 17,4% (average in 2021: 17,8%)

Exterior:

Breeding type: Alger 522 is a stallion with good breed expression. He has a vertical neck that lacks a bit of length. The head-neck connection is a little heavy because the poll is small.

Conformation: Alger 522's topline has satisfactory strength. Length in the foreleg is satisfactory and he has favourable croup conformation with satisfactory length.

Legwork: Alger 522's legwork is a bit coarse but dry quality is satisfactory. Stance of the legwork is correct, the stallion has somewhat sloping pasterns and generous feet.

DNA-tests:

Hydrocephaly: non carrier

Alger 522 completed an ABFP Test at the age of three for which he was rewarded with the AAA predicate and 88 points under saddle. As a 5-year-old, so as a slightly older stallion, he joined the Central Examination. Considering his age he should demonstrate a bit more elevation and self-carriage. This did however, clearly improve during training in the course of the Central Examination. Alger 522 has more than satisfactory aptitude for driving horse.

Training report:

Alger 522 is a calm and cooperative stallion. He showed clear progress in his training during the Central Examination. Overall he should display more suppleness.

Walk: Alger 522's walk is roomy and rhythmic.

Trot: His trot is roomy but he should develop more rise in the front. His hind leg shows satisfactory bend but should step forward under the body with more alacrity.

Canter: In canter Alger 522 demonstrates ground-covering strides with satisfactory Impulsion.

In-harness aptitude:

Alger 522 has gone through a positive development in the in-harness part of the Central Examination. He is an uncomplicated stallion with more than satisfactory activity in the legs. His walk is roomy but needs to be a little more direct. In trot he displays good scope in use of the foreleg but he should maintain more of a closed outline and demonstrate a bit more use of the body. Alger 522 has good aptitude for driven work, but less so for showdriving work.

Test results riding test:

Walk	8.0
Trot	7.0
Canter	7.5
Balance & Posture	6.5
Suppleness	7.0
Transitions.....	6.5
Impulsion	7.0
Total	78.5

Test results driving test:

Walk	8.5
Trot	7
Balance & Posture	6.5
Suppleness	7
Transitions.....	6.5
Impulsion	7
Total	78.5

Test results showdriving test:

Use foreleg	7.5
Use hind leg	6.5
Moment of suspension	7.0
Posture	7.0
Front.....	6.5
Suppleness	6.5
Impulsion	7
Total	76

Findings Performance Test:

Alger 522 has a roomy, rhythmic walk. In trot his movement is a little downhill but leg technique is roomy and rhythmic. He has satisfactory aptitude for riding horse and driving horse. In showdriving he should move with more elevation and front.

Dam report:

Alger 522's dam is Matsje fan de Pikestjelp Star AA (Wylster 463), born in 2012. Alger 522 is the first of her five foals. Matsje is an alert mare with lots of breeding type thanks

to abundant feathers and an expressive, slightly longish head. She had good length in the neck, and a bit of an under neck. The mare has a downhill, slightly longish frame and should present a more closed topline. The croup lacks a bit of length. The legwork is delicate and dry and the mare has correct stance in the hind leg. Her walk is active with good impulsion, she should develop a bit more length of stride and place the foreleg more forward. Her trot displays satisfactory posture, lots of impulsion and bend, but needs to develop more self-carriage from the hind leg. The mare has a somewhat restless character and a lot of forward go. In 2015 Matsje scored 81.5 points for her ABFP Driving Test. Further down in Alger 522's dam line we find fertile and successful broodmares. Such as 3rd dam and Model mare Oelkjen, who is Preferent and Performance thanks to two Sport mares (one who is Model), two Preferent mares and a mare who is Crown and Performance with an AAA score.

Final conclusion:

Alger 522 is a stallion with three satisfactory basic gaits in which his walk positively catches the eye with roominess of strides. His trot is also roomy, with a slightly slow hind leg. On the basis of the above data the stallion Aizo fan Twillens Star AAA is registered in the Studbook for stallions under the name of Alger 522.

Advice:

Alger 522 is a low-kinship stallion and that means he contributes to outcrossing. He can improve scope in walk and he has a calm and cooperative character.

Faust 523

Stallion information

november 2021

Studbook name: Faust B Ster (201703412) **Lineage:** Maurits 437 x Model*2 AAA Haitse 425 x Ster Pref*5 Lettert 306 x Ster Pref*4 Hearke 254 x Ster Pref*6 Lammert 260 x Ster Pref*6 Ritske 202 **Date of birth:** 21 mei 2017 **Height at withers:** 1.70 **Pedigree:** 115 **Kinship:** 18,3% (average in 2021: 17,8%)

Exterior:

Faust 523 is a big-framed stallion with a strong build.

Breeding type: Faust 523 has a head that could be a bit more noble in expression, his neck is long, slightly heavy and the stallion has satisfactory feathers.

Conformation: Faust 523 has a strong topline and the long shoulder has good conformation. His croup is also long. The stallion has a strong and proportionate build.

Legwork: The legwork is dry, the hind leg is slightly sickle-hocked. Faust 523's feet are a bit narrow.

Performance Test::

Faust 523 joined the Central Examination as a 4-year-old.

Training report

Faust 523 is a very steady stallion who has performed very consistently throughout the entire Test.

Walk: Faust 523's walk has satisfactory scope with more than satisfactory use of the body. He should learn to place the foreleg forward from the shoulder with more scope.

Trot: The stallion displays an uphill trot with good suppleness. He has good bend in the hock, is good at transitions and develops good self-carriage from the hindquarters.

Canter: Faust 523 has an uphill canter with roomy strides and powerful use of the hind leg.

Riding horse aptitude:

Faust 523 possesses good aptitude for riding horse, showing lots of power, balance and suppleness in trot and canter. In addition to that he also has a good mentality and is very easy to train.

In-harness aptitude:

With the in-harness work the stallion presents lots of front, moves well over the back and demonstrates very strong movement. He has a lot of go, is well on the aids, trots with good balance and easily follows the driver's hands. Faust 523 is exceptionally talented for driving and showdriving work.

Test results riding test:

Walk	7.0

Impulsion	9
Total	95

Findings Performance Test::

Faust 523 is a stallion who demonstrates power and suppleness in all movement. He gives riders as well as drivers a very good feeling. Faust 523 is very talented for the sport and is a true allrounder.

Dam line:

Faust 523's dam is Model AAA mare Fardau M. (Haitse 425). She is a 12-year-old, durable, big-framed and strongly-

built mare. She earned her AAA status with an IBOP Riding Test score of 82.5 points, including an 8.5 for trot. She has five offspring, four of whom are stallions. Fardau has satisfactory expression in the head, her poll would benefit from a bit more length and she has a long and vertical neck. The mare has a strong back, the loin section and croup are well-connected. Fardau has a long croup with good conformation. Dry quality of the legwork is satisfactory and stance is correct. The walk is roomy with more than satisfactory use of the body, her trot is uphill with satisfactory scope, bend and moment of suspension.

Faust 523's granddam is Monique M. Star Preferent (Leffert 306), followed by the fertile and sport-rich lines of Oeke fan 'e Wigeri Star Preferent (Hearke 254), then Doutsen fan 'e Wigeri Star Preferent (Lammert 260) and Kania Star Preferent (Ritske 202).

Final conclusion:

Faust 523 has lots of power and suppleness in his movement, which made riders as well as drivers very enthusiastic. He is very talented for under-saddle as well as in-harness work.

On the basis of the above data the stallion Faust B. Star is registered in the Studbook for stallions under the name of Faust 523.

Advice:

Faust 523 is expected to improve movement, power, mentality and suppleness in mares with good breeding type.

Studbook name: Herre fan Hylpen Ster {201800533} **Lineage:** Nane 492 x stb Reinder 452 x Model Sport*2 Onne 376 x Ster Pref Prest*4 Olaf 315 x Ster Pref*6 Jochem 259 x Ster Pref*6 Tsjalling 235 **Date of birth:** 23 maart 2018 **Height at withers:** 1.64 meter **Pedigree:** 15 **Kinship:** 18,1% (average in 2021: 17,8%)

Exterior:

Breeding type: Herre 524 is a breed-typical stallion with a noble head and a vertical neck with satisfactory length. The stallion's head-neck connection is satisfactorily light, the neck has good length. The stallion has lots of front and a lot of feathers for a 3-year-old. Herre 524 is a youthful stallion with an elegant outline.

Conformation: The stallion radiates youth and longlined quality is satisfactory. He has a strong topline, sloping and long shoulder conformation and a slightly sloping croup.

Legwork: Herre 524's legwork is clean and dry. His legwork is good with correct stance. His feet should be slightly bigger.

Performance Test::

Herre 524 completed the Central Examination as a 3-year-old stallion.

Trainingsrapport:

Walk: In walk Herre 524 moves with relaxation and satisfactory scope, rhythm and regularity.

Trot: He has an uphill trot with satisfactory scope and lots of bend in the hind leg, which is placed well forward under the body. The rhythm is somewhat rushed and he would benefit from a slightly longer moment of suspension in trot.

Canter: The canter is uphill, with ground-covering strides and continually improved in the course of the Central Examination.

Riding horse aptitude:

Herre 524 has a youthful appearance and continually made progress in the course of the Central Examination. He is a light-footed stallion with good reflexes. He gives the rider a good feeling and has a cooperative character. Herre 524 appears to have satisfactory aptitude for riding horse.

In-harness aptitude:

Herre 524 feels at home in front of the carriage and demonstrates to have more than satisfactory aptitude for driving- as well as showdriving horse. He is easy to train in front of the carriage and responds well and directly to the driver's aids. He displays great expression in his overall

movement.

Findings Performance Test::

Herre 524 is a stallion with satisfactory aptitude for under-saddle work. As a driving- and showdriving horse he possesses more than satisfactory aptitude, great front and good leg technique.

Dam report:

Herre 524 is the first foal his dam Hinke fan Hylpen gave birth to. She is a third-premium Studbook mare who was sold abroad. His granddam is Model Sport mare Wietske fan Hylpen (Onne 376), a half-sister to Eise 489 (Maurits 437). Their dam is Lieke fan Hylpen Star Preferent Performance (Olof 315), who has one Sport Elite and three Sport offspring, one of whom is also Model. It is a line brimming with sport horses in dressage, driving and showdriving.

Final conclusion:

Herre 524 is a stallion with modern lines and lots of front, a very youthful appearance, correct legwork and the stallion has satisfactory aptitude for under-saddle work in which he shows potential for more progress. With the in-harness work the stallion has more than satisfactory aptitude for both driving- and showdriving. He makes a lot of front, makes himself big in front of the carriage and shows lots of bend in the hind leg. Herre 524 has good forward reach in the foreleg with a satisfactory moment of suspension. On the basis of the above data the stallion Herre fan Hylpen Star is registered in the Studbook for stallions under the name of Herre 524.

Advice:

Herre 524 is a good match for big-framed mares and is expected to improve swiftness of the hind leg.

Performance Test::

Stallion Hilbrand 525 joined the Central Examination as a 3-year-old. Especially in the beginning he struggled a bit with the work. He was easily distracted and came across as slightly phlegmatic.

As the test progressed this strongly improved. Particularly in the in-harness work Hilbrand 525 is light-footed, pleasant and good to train.

Trainingsrapport:

Walk: In walk Hilbrand 525 moves with scope and good rhythm. He walks well through the body and stays very rhythmic in the transition from walk to trot.

Trot: The stallion trots with good scope and a foreleg that reaches well forward. He still needs to develop a little more swiftness from the hind leg and therefore struggles a bit with moving in a closed outline. The stallion moves with good looseness in the body.

Canter: Hilbrand 525 canters with ground-covering strides and satisfactory uphill outline. His canter would benefit from a little more light-footedness.

Riding horse aptitude:

Hilbrand 525 has satisfactory aptitude for riding horse, a discipline in which his roomy, rhythmic walk catches the eye. In ridden work he finds it a bit difficult to move in a closed outline, but he moves with good suppleness and good use of the body. Hilbrand 525 has a tendency to be a bit phlegmatic.

In-harness aptitude:

Hilbrand 525 is a pleasant horse who responds well to training. He has a walk with good scope and he moves strongly forward from the hind leg, relaxing well through the back. The stallion has an active trot with good suppleness. Transitions forward within the pace come easy to him and he willingly follows the driver's hand. As a showdriving horse the stallion should rise more in the withers and display a sharper use of the hind leg. Hilbrand 525 responds well and alert to the driver's aids.

Findings Performance Test::

Hilbrand 525 is a good and all-round utility horse with a walk that stands out for its good rhythm. The stallion's work ethics and trainability in the in-harness part of the Central Examination are very positive.

Dam line:

Sjoukje B. Star AA (Alwin 469) is Hilbrand 525's dam, he is her first offspring. Sjoukje has completed an ABFP Test and received high scores for her good walk, suppleness and impulsion. The granddam is a Star mare by Haitse 425, followed by a Star Preferent AA daughter of Lettert 306, followed by a Star Preferent Performance mare by Reitse 272 and a Star Preferent mare by Naen 264. Both dam and granddam are mares with good size.

Final conclusion: :

Hilbrand 525 is a stallion with a proportionate build and good breed expression. He is an all-round horse and he scores highest on aptitude for driven work. On the basis of the above data the stallion Hinne B. is registered in the Studbook for stallions under the name of Hilbrand 525.

Advice:

Hilbrand 525 is expected to improve proportionate build and croup length. He can have a positive influence on scope and activity of the walk.

Studbook name: Gerben A.L. Ster (201802385) **Lineage:** Nane 492 x Ster Pref*6 Beart 411 x Ster Pref*4 Lettert 306 x Model*1 Bendert 281 x Ster Pref Prest*5 Hearke 254 **Date of birth:** 31 mei 2018 **Height at withers:** 1.64 m **Pedigree:** 25 **Kinship:** 18,6% (average in 2021: 17,8)

Exterior:

Breeding type: Gosse 526 is a breed-typical stallion with a slightly long head, good length in the neck and vertical neck conformation. The stallion has a lot of front, satisfactory feathers and coat colour is black.

Conformation: Gosse 526 is a longlined, youthful stallion. He has a satisfactorily uphill build and a strong topline. The stallion has good, sloping shoulder conformation with good length. Croup conformation is slightly sloping but with good length. He has a long gaskin (second thigh).

Legwork: The stallion has good length in the foreleg. He has a long, somewhat small-angled hind leg. The quality of the legwork is good and Gosse 526 has generous feet.

Performance Test:

Gosse 526 was a 3-year-old stallion when he completed the Central Examination.

Trainingsrapport:

Walk: Gosse 526 has a walk that is relaxed, roomy and regular, with good use of the body.

Trot: In trot the stallion shows lots of balance, suppleness and elevation, moving with good bend and alacrity from the hind leg. Transitions come easy to Gosse 526 and throughout the transitions he keeps moving with a carrying hind leg. He demonstrates lots of scope in the use of the foreleg.

Canter: Gosse 526 canters with good-quality strides, in an uphill outline and good use of the body.

Riding horse aptitude:

In ridden work Gosse 526 is easy to ride and responds well to training. He has a cooperative character. When relaxed he demonstrates a good, rhythmic walk with good looseness. The trot is ground-covering with good use of the body and reflexes are satisfactory. In trot Gosse 526 is able to extend the pace from the hind leg with good reach in front of the foreleg. In canter he moves with uphill strides and good use of the body. Gosse 526 gives his riders a relaxed feeling, is cooperative and keeps a constant contact on the bit. He reacts well to the aids.

In-harness aptitude:

With the in-harness work Gosse 526 displays the same qualities as he does under saddle. In front of the carriage the stallion makes a lot of front and moves with an active and quick hind leg. Gosse 526 has good leg technique when extending within the pace. In the in-harness work the stallion sometimes struggles a bit with the contact and here he should respond a little more to training. As a showdriving horse he has a lot of knee action, with uphill body posture, lots of front with good carrying capacity from the hind leg.

Test results riding test:

Total	90.5

Findings Performance Test:

Gosse 526 is a stallion with plenty of aptitude, both under saddle as well as for the in-harness disciplines. The stallion moves with an uphill posture and good leg technique, both in the hind leg and in the foreleg. The canter is spacious and uphill and the stallion has good suppleness.

Dam report:

General: The 15-year-old Star Preferent mare Rinske L. (height at withers 1.62 m) is in good condition and is a fertile broodmare (pregnant with her 12th foal). She is a mare with a lot of breed expression, an expressive, slightly longish face and large eyes. She has lavish manes, a long forelock and thick socks. Rinske is an alert-looking mare with a friendly disposition. She has vertical neck conformation with satisfactory length. She proves to have satisfactory sustainability in topline and legwork, which has the correct stance and satisfactory dry quality. The mare has generously-sized feet. Her walk has rhythm and scope. Her trot is regular with good bend in the

hock and strong impulsion. She should bring the hind leg a bit further under the body and forward reach of the foreleg is satisfactory. In trot Rinske demonstrates satisfactory suppleness and use of the body.

Dam line: Gosse 526's dam is Star Preferent with six Star offspring and with Gosse 526 now also has a son who is an approved stud stallion. One son is Sport Elite, one son has earned the AA predicate. On the basis of Gosse 526's scores in the Central Examination Rinske L. has also obtained the Performance predicate. Her full sister is Crown Preferent with the AA predicate. Gosse 526's granddam is a Star Preferent mare whose sire is Leffert 306. She has three Star offspring and a Crown mare with the AA predicate. This Amarins became Preferent on the basis of her first five offspring. His 3rd dam is a Model mare by Bendert 281 and next is Klazina Star Preferent Performance (Hearke 254) who gave five offspring, all of them mares, with three of them Model (two also Preferent) and the other two became Star Preferent. Klazina is the granddam of Hinne 427 (Tsjerk 328). Gosse 526 stems from the Vesta line of pedigree 25.

Final conclusion: :

Gosse 526 is a modern, longlined stallion with a great front. He has a correct, strong topline, a slightly sloping croup with a long hind leg. The stallion possesses three good basic gaits in which he demonstrates good use of the body and suppleness. The trot is uphill with a sharp and well-engaged hind leg. The canter is spacious with uphill strides. In the course of the Central Examination Gosse 526 has gained in strength and demonstrated to have great aptitude for riding horse and in-harness horse. On the basis of the above data the stallion Gerben A.L. Star is registered in the Studbook for stallions under the name of Gosse 526.

Advice:

Gosse 526 is expected to improve use of the hind leg. He is best paired to mares with correct croup conformation and without a small-angled hind leg.

General

Julius 486 was approved in the spring of 2015 as a 4-year-old stallion on the basis of his good exterior and his excellent performance in the Central Examination in America. An observation was added that the stallion has good-quality lineage which does not contribute to outcrossing. From his first stud season 91 foals were regiStared, with 78% born out of (at minimum) Star mares. Julius 486 completed his Progeny Test in 2021 based on two year collections of 3-year-old offspring; the first six in the United States and the other fourteen in the Netherlands.

Exterior

Julius 486 was approved in the spring of 2015 as a 4-year-old stallion on the basis of his good exterior and his excellent performance in the Central Examination in

America. An observation was added that the stallion has good-quality lineage which does not contribute to outcrossing. From his first stud season 91 foals were regiStared, with 78% born out of (at minimum) Star mares. Julius 486 completed his Progeny Test in 2021 based on two year collections of 3-year-old offspring; the first six in the United States and the other fourteen in the Netherlands.

Character/Training report:

The Julius 486 offspring have pleasant and calm stable manners. Reliability in the work is more than satisfactory and they score average on trainability and responsiveness to the aids.

Movement/Performance:

From the Julius 486 offspring 20 individuals have taken part in ABFP Tests. The performance image of the Julius 486 offspring shows satisfactory trainability but generally speaking they should place the hind leg more forward under the body and they need to develop more Impulsion. The walk is mostly correct in terms of regularity but should demonstrate more scope and capacity for transitions. The trot is active with fine use of the foreleg but

the horses have to develop more self-carriage and move in a more uphill frame. The canter demonstrates more than satisfactory balance and good technique, but again, the horses need to develop more self-carriage. The horses demonstrate more than satisfactory aptitude for riding- and driving horse and have satisfactory aptitude for showdriving.

Conclusion

Julius 486 has a more than satisfactory hereditary profile for exterior (Star % is 41). In terms of character the offspring have pleasant contact manners. As sport horses they demonstrate more than satisfactory talent whereby especially in trot the carrying capacity of the hind leg should increase. Based on the overall hereditary profile, Julius 486's stud license will be sustained.

Eise 489

Report Progeny Test

December 2021

Date of birth: 10 juli 2009**Breeder:** Fam. De Vries, Hindeloopen**Owner:** Stal Chardon, Jorwert**Pedigree:** Maurits 437 x Star pref prest Olof

315 x Star pref Jochem 259 x Star pref

Tsjalling 235 (line 15)

Kinship: 18.6%**Particulars:** drager van waterhoofdgen

General

Eise 489 was approved in the autumn of 2015 as a 6-year-old stallion, on the basis of his good lineage, his good exterior and his very good performance in the Central Examination. He has proven to be very talented for riding and driving and exceptionally talented for show driving. From his first stud season 112 foals were registered, with 88% born out of (at minimum) Star mares. Eise 489 completed his Progeny Test in 2021 on the basis of two year collections 3-year-old and some 4-year-old offspring.

Exterior

The Eise 489 offspring are a uniform group of youthful, satisfactorily longlined horses with satisfactory height. They have more than satisfactory breed expression but should be a bit stronger in the connections. The heads are expressive. The horses have

light head-neck connections and long necks that should be a little more vertically built. The horses would benefit from more feathers. The foreleg has more than satisfactory length. Body shape of the horses is slightly downhill. Shoulder conformation is a bit steep. The horses have satisfactory correctness in shape of the back and the loins are often weak. The croups have satisfactory length and score average on conformation. Quality of the legwork is good. Seen from the side stance of the foreleg is correct. Stance of the hindleg is correct. Seen from the front stance of the foreleg is toeing-in. The feet would benefit from more size. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report:

The Eise 489 offspring have very pleasant, calm, relaxed stable manners and are inquisitive horses. In training they are very reliable horses with good trainability. The horses have great zest for work, are very responsive to the aids and are happy horses with a lot of perseverance and stamina.

Movement/Performance:

From the Eise 489 offspring 20 individuals

have taken part in ABFP Tests. The emerging performance image of the Eise 489 offspring shows easy trainability, good posture and balance and lots of impulsion. The walk varies in terms of rhythm and regularity and generally needs more length of stride. In the course of the test the walk did however improve, so is trainable. In the remarkably good trot the horses demonstrate lots of technique and expression, they trot well from their hindquarters through to the front with lots of shoulder freedom and fine use of the foreleg. They display a good canter with lots of balance and good use of the hind leg. The horses are very talented for riding- and driving horse and have relatively good aptitude for showdriving.

Conclusion

Eise 489's hereditary profile for exterior is satisfactory (Star % 47). In terms of character the offspring have very pleasant contact manners. They have good aptitude as a sport horse, but the walk needs attention. Based on the overall hereditary profile Eise 489's stud license will be sustained.

Meinte 490

Report Progeny Test

December 2021

Date of birth: 22 maart 2012

Breeder: J.W.M. Cent, p/a Netterden

Owner: A. Thomassen, Lunteren

Pedigree: Beart 411 x pref Anton 343 x Star pref Jelmer 297 x Star Reitse 272 (line 15)

Kinship: 18.4%

Particulars: -

General

Meinte 490 was approved as a 3-year-old stallion in the autumn of 2015 on the basis of his good-quality lineage with a Studbook dam who breeds well, a more than satisfactory exterior and more than satisfactory performances. From his first stud season 75 foals were registered, with 88% born out of (at minimum) Star mares. Meinte 490 completed his Progeny Test in 2021 based on two year collections of mainly 3-year-old offspring.

Exterior

The Meinte 490 offspring are a uniform group of slightly classical horses with satisfactory height that are slightly lacking in breed expression and conformation. Expression of the heads is satisfactory. The necks need a bit more length and should be more vertical. The horses would benefit from more feathers. The horses are short in

the foreleg and generally have a downhill conformation. Shoulder conformation is sloping. Strength of the back is satisfactory but the loins should have a better connection. The croups have satisfactory length with sloping conformation. Seen from the side, stance of foreleg and hind leg is correct. Seen from the front, stance of the foreleg is toeing-in. The offspring have generously-sized feet. Quality of the legwork is good. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report:

The Meinte 490 offspring have pleasant, calm stable manners and are inquisitive horses. In training they are reliable horses with good trainability. The horses have great zest for work and learning capacity, are very responsive to the aids, are not easily distracted and have a lot of perseverance and stamina.

Movement/Performance:

From the Meinte 490 offspring 20 individuals have taken part in ABFP Tests. The performance image of the Meinte 490 offspring shows them to be nice, easily trainable and agreeable horses that give a positive impres-

sion. They display lots of impulsion. The offspring move with a remarkably good walk. The trot produces a varied picture, mostly with ample scope but sometimes should be a little more uphill. The canter is correct with good technique and lots of quality. The horses demonstrate to be very talented for the riding and driving disciplines and are relatively very talented for showdriving, particularly because of their strong use of the hind leg, but here the horses need to show more front.

Conclusion

Meinte 490 has a satisfactory profile for exterior (Star % 39). In terms of character the offspring have pleasant contact manners. They have good aptitude as a sport horse and their walk positively catches the eye. Based on the overall hereditary profile Meinte 490's stud license will be sustained.

Jurre 495

Report Progeny Test

December 2021

Date of birth: 7 mei 2011

Breeder: H. Deinum, Schraard

Owner: Stal Chardon & H.J. Niemeyer, P/a Jorwert

Pedigree: Maurits 437 x Star pref Jasper 366 x Star Teunis 332 x Star pref Oege 267 (line 25)

Kinship: 18.5%

Particulars: drager van waterhoofdgen

General

Jurre 495 was approved in the autumn of 2016 as a 5-year-old stallion on the basis of his very good lineage, a good exterior and a good Performance Test in all three disciplines. From his first stud season 96 foals were registered, with 91% born out of (at minimum) Star mares. Jurre 495 completed his Progeny Test in 2021 based on one year collection of 3-year-old offspring.

Exterior

The Jurre 495 offspring are a uniform group of youthful, modern horses with satisfactory height and they stand out because of their strong toplines. Expression of the heads is more than satisfactory. The necks have satisfactory length and should be a bit more vertical. The horses would benefit from more feathers. The forelegs are long and

body shape is uphill. Shoulder conformation is average. The back and loins are strong and well-connected. The croups are long and with the desired conformation. Seen from the side, stance of the foreleg is correct and stance of the hindleg is slightly sickle-hocked. Seen from the front, stance of the foreleg is often toeing-out. Size of the feet is satisfactory. The pasterns are long. Quality of the legwork is more than satisfactory. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report:

The Jurre 495 offspring have strikingly pleasant, calm and inquisitive personalities. In training they are reliable horses with good trainability. The horses demonstrate a lot of learning capacity and good work ethics.

Movement/Performance:

From the Jurre 495 offspring 20 individuals have taken part in ABFP Tests. The performance image of the Jurre 495 offspring shows little uniformity. The walk is mediocre in terms of rhythm, ground-coverage and use of the body. In trot the horses display good technique with satisfactory posture but they are still

struggling a bit with the balance. The hind leg should be placed more forward under the body with more alacrity and direction. The horses need to develop more power in canter: in many cases the canter is downhill, the horses stay high in the croup. The horses demonstrate satisfactory aptitude for riding- and driving horse.

Conclusion

Jurre 495 has a good hereditary profile (Star % 60). In terms of character the offspring have very pleasant contact manners. The aptitude for the sport presents a variable picture. They have satisfactory aptitude as a sport horse, but the walk needs attention. Based on the overall hereditary profile Jurre 495's stud license will be sustained.

Stallion family-tree KFPS-studbook stallions

December 2021

In this overview the KFPS-studbook stallions are displayed in 4 studs lines: Age, Ritske, Jarich and Mark. The outline only include the stallions that currently have a covering license or in the direct male line of an active Stallion arise or are the maternal grand dam of an active studbook Stallion. In parentheses the Mareline from which a Stallion results is displayed as well as the maternal grand dam and the maternal great grand dam. The current, living and available studbook stallions are indicated in blue.
