Stallion information 2022

We provide the Stallion information 2022 as a tool to help with stallion choices. Opting for the best-quality stallions when choosing a stallion is not the only key factor to be considered, making correct pairings is even more important. The KFPS strives to provide as many data as possible about hereditary aspects of stallions.

The new layout

The layout of this Stallion information has been renewed. All the information about the concerned stallion has been brought together in one clear overview. The list with totals can be found on the

website under breeding > Totals studbook stallions.

Which stallions?

The 2022 edition lists all active and living stallions. When looking at breeding values for exterior it must be taken into account that the data of young stallions does not include information of their offspring. These breeding values are based on lineage information and exterior assessment (linear scores) of the stallion itself. For stallions that have completed progeny testing the breeding values are almost completely based on inspection data (linear scores) and ABFP data of offspring. The reliability of breeding values for young stallions is still low. This means that their breeding values are more likely to change (when more offspring are inspected or tested) than in the case of older stallions with a high reliability index. Because of this lower reliability of breeding values for young stallions, these are based on a more reserved estimate and are therefore closer to the breed average (100).

Which characteristics?

The following characteristics of stallions are listed:

- 1. Breeding value (linear) exterior characteristics
- 2. Breeding value for movement/sport aptitude (based on aptitude tests)
- 3. Breeding values for character
- 4. Breeding values for sport (based on competitive sport)

Breeding values exterior and sport aptitude

Considering the complexity of breeding value estimates for exterior characteristics and sport aptitude, it is necessary to provide an explanation about how these figures should be interpreted and how they are compiled. The explanation also pays attention to how these figures can be used for stallion choices.

Linear exterior characteristics

The breeding values for the exterior characteristics are based on

the linear scores, which have been recorded at the moment of acceptance of horses in the Studbook since 1993. Scores ranging between 5 and 45 are recorded for 25 exterior characteristics, with the average being 25. In the case of linear characteristics we are strictly dealing with observations, and not evaluations. The choice of characteristics is such that the linear report provides a picture of the horse's exterior that is as complete as possible. The linear characteristics are divided into two entities: Optimum characteristics: characteristics with the average score (25) or breeding value (100) being the most favourable. Examples of such characteristics are: back conformation and hind leg conformation. Maximum characteristics: characteristics based on the principle of the higher the score the better (e.g. expression of the head, movement expression etc.) or characteristics where the optimum clearly lies above the average, like neck conformation and shape of the hoof. The difference is made visually visible because the breeding values for maximum traits are shown in dark blue bars (favorable) and red bars (unfavourable) and breeding values for optimum traits in light blue bars. In addition to the 25 linear features, the overview consists of a measured feature, the height.

The appreciative exterior features

In addition to the 25 linear exterior characteristics, scoring is also done for 3 rating characteristics: breeding type, conformation and legwork. Whereas linear characteristics are mere descriptions, the rating characteristics are evaluative. For the assessment of the rating exterior characteristics the related linear characteristics play an important role. The rating characteristics are scored within the range of 4 to 9. Since 2016 the marks for rating characteristics that are scored in the context of upgrading are also included in the breeding value estimate. Additionally, since 2017 the lower bar figures scored in the classes for Star mares are also included in the breeding value estimate.

Movement and sport aptitude

The breeding values for the movement characteristics walk, trot and canter are computed on the basis of the scores for walk and trot in the exterior inspection and the scores for walk, trot and canter from the aptitude tests (ABFP and IBOP). The higher the number of offspring whose information is collected from the aptitude tests, the smaller the influence of in-hand movement will be for breeding values. In case of large numbers of offspring and the information derived from their aptitude tests, the influence of in-hand movement even becomes virtually zero. The

reason for this being that movement in the aptitude tests (under saddle and in harness) is closer to the breeding goal than in-hand movement.

Character

Breeding values for character are included since the 2020 edition. This information stems from the twenty offspring in the ABFP Tests that are scored on character by the rider team. The published character/personality characteristics are: reliability/predictability; trainability; willingness to work and stamina.

Sports (competitive sports)

Since the 2022 edition the breeding values for sport accomplishments will be taken in account for the first time. The information is provided by the KNHS and lists the highest known scores for Dressage and Driving Dressage. The reliability is still low and the degree of heredity small. For the future the intention is to also add the international sport data from the Sport Federation FEI and the results in showdriving sports.

Estimation model

The breeding values, estimated by CRV, are estimated with a so-called estimation model. The estimation model indicates which factors that influence the differences between (in this case) stallions are subjected to corrections. The exterior scores are corrected for the following effects: Breeding value of the offspring's dam, age at the moment of inspection, gender; Jury member and inspection. This correction is carried out in order to produce the clearest picture possible of the degree in which the differences between batches of offspring are caused by a difference in genetic aptitude of the stallions. Because of these corrective factors it basically does not matter if one stallion is paired to higher-quality mares than others. The type of estimation model used is the so-called animal model. Along with data of offspring, animal models also include information of relatives. The contribution of this information decreases as the available information of offspring rises.

Interpretation of breeding values

points on either side. This basis was fixed at 2001. The average breeding values of all horses born in 2001 was fixed at 100 for every characteristic and the range (standard deviation) of these breeding values was fixed at 4. Breeding values with a deviation from 100 of one time the range (between 96 and 104) have to be considered as being average. Over 2/3 of the breeding values is found in this area. It is self-evident that the larger the deviation from 100, the bigger the expected effect will be. A stallion with a breeding value of 109 or higher for say, movement expression, ranks with the best 2% of stallions in the population. With a breeding value higher than 112 this is 0.1%. The breeding values for total-exterior and total-movement are the

average of the underlying characteristics (breeding type, onformation and legwork respectively walk, trot and canter), multiplied by 1.25 in order to achieve a range of 4 for the totalbreeding values.

Description of breeding values

The breeding values are depicted by 'bars' per individual characteristic. As pointed out, the maximum characteristics are printed with dark-blue (favourable) and red (unfavourable) and optimum characteristics with light-blue bars. For optimum characteristics, (extreme) deflections to the left or right represent an unfavourable picture, 100 is the optimum. Summarising: bars to the left are usually unfavourable and bars to the right are favourable, except for the light-blue bars.

Reliability

The degree in which the breeding value gives an accurate picture of the true genetic aptitude of a stallion is expressed in the reliability (btbh.). The reliability is chiefly influenced by the number of inspected offspring. Breeding values with a low reliability can still change considerably when more offspring are inspected. The reliability can be interpreted as follows:

btbh.	interpretation
< 70%	moderate reliability
70-80%	reasonable reliability
80-90%	good reliability
>90%	very good reliability

The reliability for every breeding value has to be 30% or more to be considered for publication.

Use of breeding values

The breeding values for exterior are an excellent tool for making the right pairing combination. The way to do this is by checking the mare's linear score form for points that have to be corrected. If the characteristic that needs to be improved is a maximum characteristic then a stallion must be selected who has a (distinctly) positive hereditary image for passing on this characteristic (bar to the right). If it is an optimum characteristic then the best choice would be a stallion with a (light) deviation in the opposite direction, depending on the mare's score. Use of breeding values for sport aptitude. As you can see there are estimates for breeding values of basic gaits in the exterior bar and in the sport aptitude bar. The first is based on the assessment of basic gaits in the inspection ring (in-hand), whereas the second is based on the assessment of basic gaits in use (ABFP Test). For most stallions these breeding values largely overlap. There are however, stallions whose breeding value for basic gaits in the sport index is a fair bit lower than the breeding value for basic gaits in the exterior bar. As the breeding goal stimulates the breeding of horses with good basic gaits in use, the breeding

values for sport aptitude should carry more weight in your valuation of stallions.

Kinship percentage

Studbook stallions are given a kinship percentage. This figure states the relatedness of the stallion with the population. The lower this figure, the bigger such a stallion's contribution to variation in bloodlines can be. The average percentage of Studbook stallions lies around 17.8%. The kinship percentage is computed by calculating the inbreeding of fictitious foals from combinations of all individual stallions with the mare population. The mare population being defined as all filly foals born in the past three years, in total over 8000 animals. For the inbreeding calculation all known generations are included (so not just the first five generations). The kinship percentage is influenced by the degree in which the bloodlines match, or deviate from the population. When a stallion is used more often the kinship percentage will increase. The kinship percentage is one of the characteristics that are taken into account for the young stallion selection, with the aim to limit the increase in inbreeding. This edition is the first in which corrections are applied for missing pedigree information in the calculation of kinship percentages. This is the reason why the kinship percentage for stallions with a 'shortdam line' has been revised upwards.

Preference Points

The number of points for preferent status is also stated for each stallion in this Stallion Information. The preference status is a sum of points that the offspring of the stallion receive when they have received a predicate. There are weighting factors for

each predicate. For example, a Star counts for 1 point and a studbook stallion that is approved on progeny contributes 50 points. The total of these points are stated with the stallions, however the rule of thumb that 1000 points yields the Preferent predicate no longer applies. For studbook stallions with at least 700 offspring aged at least three years and older, a ratio is also calculated and published annually. This ratio indicates whether a stallion performs exceptionally compared to other stallions in that year. The average ratio over a number of years determines whether a stallion can become Preferent. For more information about the preference points: www.kfps.nl →The KFPS → rules and regulations → registration regulations.

Stallion information on the website

On the KFPS website (www.kfps.nl) information about stallions can be found under Information on breeding and via MyKFPS. By stating selection criteria it is also possible to make selections in stallions.

*A Studbook stallion's breeding status is determined on the basis of the Progeny Test. For this stallion, the requirement that at least 20 offspring must have completed a performance test before the start of the 7th breeding season has not been fulfilled. This requirement is expected to be met during the 2023 season. After completion of the performance tests, the inspection will evaluate the collected results and formulate an advice to the board. Based on this advice, the board will make a decision on the stallion's breeding status.

Breeding | Foal reporting 2022

Foal Reports 2022

Every year the KFPS Inspection publishes reports about the foals of the new stallions. From the collection of stallions whose first foals appeared in last season's inspection rings, there were not enough foals presented for scoring to produce a reliable picture. Hence the reports below only give a tentative idea about the hereditary qualities of the stallions Beant 517, Fryso 518, Dedmer 519 and Foeke 520.

Beant 517

(Hessel 480 x Tsjalle 454)

The Beant 517 foals show satisfactory development, they are satisfactorily longlined as well as high-legged. Body shape has satisfactory horizontal quality. The foals have more than satisfactory breeding type. Most have more than satisfactory expression of the head but some individuals have plain heads. The head-neck connection is average to light. The necks have good length and range from horizontal to vertical in conformation. Shoulder conformation ranges from average to sloping. Back and loin section should be a lot stronger in many cases. The croups have good length but vary in terms of conformation. Stance of foreleg and hind leg is generally correct. About half of the foals are sickle-hocked in the hind leg. The legwork radiates quality. Across the board the walk has satisfactory strength and length. The trot has lots of scope but varies in terms of power and posture. The foals demonstrate more than satisfactory suppleness. The hind leg should be placed further forward under the body.

Fryso 518 (Hessel 480 x Jisse 433)

The Fryso 518 foals display satisfactory development and most have satisfactory longlined builds with satisfactory high-legged quality. Body shape has satisfactory horizontal quality. The foals have more than satisfactory breeding type. Expression of the heads is satisfactory. Many of them have a heavy head-neck connection. The necks have good length and most have vertical conformation of the neck. Shoulder conformation ranges from steep to medium sloping. The back and particularly the loin section could be stronger. The croups present a variable picture in terms of length and conformation. Stance of the foreleg as well as hind leg is generally correct. The legwork has satisfactory dry quality. The walk demonstrates more than satisfactory ground-coverage and more than satisfactory power. The trot has satisfactory scope as well as power. The foals trot with satisfactory suppleness and satisfactory posture. The hind leg should be placed further forward under the body.

Dedmer 519

(Alwin 469 x Teeuwis 389)

The Dedmer 519 foals have satisfactory development with satisfactory longlined builds and horizontal body shape, but they should be a little more high-legged. Expression of the heads is satisfactory, the head-neck connection is somewhat heavy and the necks are long and vertical. The shoulder shows satisfactory slope. They have satisfactory strength in the back but often the loin section should show a little more strength. The croup has satisfactory length and is lightly sloping. Stance of the foreleg is usually correct. Many are sickle-hocked in the hind leg. The legwork is dry. The walk shows satisfactory length of stride and satisfactory power. The trot has more than satisfactory power and is average in terms of body posture and suppleness. The hind leg is placed well forward under the body.

Foeke 520 (Jehannes 484 x Onne 376)

The Foeke 520 foals are not a uniform group but they have more than satisfactory development and longlined builds. With their generous forehands they score high on breeding type. Length of legwork and body shape are very variable. The heads are also variable. Some have rather long faces. The head-neck connection is usually light. The necks are long and generally have vertical conformation, although we occasionally see horizontal shape of the neck. Shoulder conformation is average. Quite a few need more strength in the back. Strength of the loin section is satisfactory. The croups are variable in terms of length and conformation. Stance of the foreleg is usually correct. Stance of the hind leg is also mostly correct. About a third of the foals are sickle-hocked in the hind leg. The legwork radiates quality. The walk shows satisfactory strength but generally speaking should be a little more ground-covering. The trot has lots of scope and is powerful. Body posture and use of the hind leg are pretty diverse. The foals mostly demonstrate more than satisfactory suppleness.

Notities

Stallion information

august 2022

Wiebert 527

Studbook name: Wybren van ASS Vb Star Sport Elite (200701223) **Breeder:** Mrs A. Schaefer, Kerpen (DE) Date of birth: March 27, 2007 **Height at withers:** 1.68 metres **Lineage:** Maiko 373 Sport x Stb Pref Prestm*8 Brandus 345 Sport Pref x Star*3 Tjimme 275 x Model Pref*5 Tsjalling 235 Pred x Vb*3 Freark 218 x Star*1 Geert 184 **Pedigree:** 50 **Kinship:** 17.7 % (average in 2021: 17.8%)

Short Test:

Wiebert 527 has qualified for the Short Test on the basis of his performances in the sport. He had already received the green light in early 2019 but due to Covid 19 this could not take place at that time. Eventually, the stallion completed the Short Test in South Africa between July the 21st and August the 4th 2022. The stallion has successfully completed the Test.

Exterior:

Breeding type: Wiebert 527 is a stallion with good breeding type thanks to his noble and attractive head and his long and vertical neck. The stallion has satisfactory feathers and coat colour is black. Wiebert 527 has a youthful appearance.

Conformation: Wiebert 527 is a high-legged stallion with a modern build. Body

shape is a fraction downhill. His shoulder has length and average conformation, shape of the back and loins is good with satisfactory muscling. Conformation of the croup is good and has satisfactory length. The 15-year-old Wiebert 527 shows a lot of durability.

Legwork: Seen from the front stance of the legwork is straight, the feet are narrow. Stance of the hind leg is correct with the correct angle in the hock. Dry quality of the legwork is satisfactory.

Stable manners:

Wiebert 527 was in good condition when he arrived at Elora Warmblood Stud in Potchefstroom and quickly adjusted to his new surroundings. In the yard and stables he is always relaxed, even in the presence of mares. The presence of mares does not trigger any trouble or changes in in his behaviour.

Wiebert 527 is a stallion with an honest character, he is a true gentleman. He is a stallion with a pleasant personality and constant in his behaviour, both in-hand as well as under saddle. His behaviour proves him to be happy, friendly and

reliable. He has excellent manners and behaves respectfully to the people around him. In the stable he is relaxed and obediently accepts all interaction with his handlers.

Work ethics:

Wiebert 527 has an excellent attitude to work. He is strongly focused on his trainer and reacts well to the aids. He is transparent in terms of what mood he is in and predictable in terms of respectful behaviour. During his stay he hasn't shown any stress-related behaviour and he does not get distracted, neither does he easily tense up.

Sport aptitude:

Wiebert 527 is active in the Light Tour. The stallion has great zest for work, presents a pleasant and relaxed overall image and shows lots of suppleness. He has a cooperative character. He displays good bend through the body in shoulderin and half pass as well as good technique in piaffe and passage. The stallion also demonstrates to have a remarkably good technique in the canter changes. The clinical examination showed him to have a quick capacity for recovery in terms of heartbeat and breathing.

Assessment by guest rider:

Wiebert 527 gives his rider a good feeling and is found to have a very good mentality. He moves in a light contact, when asked for more collection he reacts with lots of spring and impulsion, but he needs to become faster in the hind leg. Especially the canter shows a lot of quality and the stallion has very good capacity for moving in a closed outline.

Walk: In relaxation the walk is regular with satisfactory scope, the walk is active with satisfactory power.

Trot: In trot the stallion shows lots of suppleness and very good posture. The foreleg is generously placed forward with a lot of shoulder freedom. The hind leg is active and more than satisfactorily placed forward under the body. He stays a little high in the croup.

Canter: Wiebert 527 displays very good technique in canter. Transitions, closing up the canter and tempi-changes come easy to him.

Dam report:

Wiebert 527 comes from the much-applauded and very reliable breeding line

50. This pedigree excels in sport. His dam is Crown Jewel Tinneke van 't Riet Preferent Performance (Brandus 345) who lived to be 24 and has given twelve offspring by twelve different stallions. In addition to Wiebert 527 she has also given Tizian fan Ass Star Sport Elite (Epke 474), who scores results of over 70% in the Light Tour under Bennie van Es and in 2021 got very far in the selection for the WC Young Dressage Horses. Half sister and Breeding Day Champion in Germany Roswhita fan Ass Crown AAA (Andries 415) earned 82 points for her IBOP with an 8 for both walk and trot. The same total score was achieved by half sister Aurelia fan Ass Star Sport AAA (Dries 421) in an IBOP driving test. In 2014 Aurelia won the Pavo Fryso Cup, Roswhita reached the final in 2019. Wiebert 527's granddam is Linda Boszorg Star (Tjimme 275), followed by Whita Model Preferent (Tsialling 235), who is Stendert 447's 3rd dam. Wiebert 527 is the first approved son for his sire Maiko 373 (Tsjerk 328 x Barteld 292).

Final conclusion:

Every time again Wiebert 527 leaves a positive impression. He displays a lot of durability and capacity, correctness and an active hind leg. He has truly mastered and easily performs the Grand Prix exercises (piaffe, passage, tempi-changes). The stallion has a very friendly character. The stallion can boast a good lineage with lots of sport in the dam line. On the basis of the above the stallion Wybren van ASS is registered in the Studbook under the name of Wiebert 527.

Advice for use:

Wiebert 527 is bound to produce Friesian horses with very good trainability and friendly personalities. Two more aspects that this stallion is expected to improve are durability and talent for the sport, also in higher dressage. For breeding it must be taken into account that he has positive carrier status for hydrocephaly.

Stallion information

november 2022

Hielke 530

Studbook name: Hielke L.W. **Life number**: 201801508 **Breeder**: Ludema family **Date of birth**: 24 April 2018 **Height at withers**: 1.63 metres Lineage: Jurre 495 x Star Jisse 433 x Star Pref*5 Tsjerk 328 x Star Pref*5 Gerlof 294 x Star Pref*4 Tsjalling 235 x Model Pref*5 Wessel 237 **Pedigree**: 1 **Kinship**: 18.0 % (average 17.8%)

Exterior:

Breeding type: Hielke 530 is a youthful stallion with classy breed expression. He has a noble head with lots of expression. The stallion presents a great front, a vertical neck with satisfactory length and abundant feathers.

Conformation: Hielke 530 has somewhat downhill body shape and could do with a little more length in the foreleg. Shoulder conformation is sloping, the back slightly sunken. Croup conformation shows satisfactory length and is lightly sloping.

Legwork: Stance of the foreleg is correct. He is a little sickle-hocked in the hind leg. The stallion's legwork is dry and clean with good size of the feet.

Estimated breeding value exterior:

Reliability	36 - 46%
Breeding type	104
Conformation	106
Legwork	
Walk	
Trot	109
Canter	101

DNA and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 3, just acceptable

Observations stable manager, riders and drivers:

Hielke 530 has a very good character. He is very friendly and intelligent. He has an eager attitude to work, trainability is very good and he stays focused on his rider, also in tense situations. An intelligent horse with a very good mentality, also with a very nice contact on the bit and he has a lot of forward go.

Central Examination:

Hielke 530 completed the Central Examination at the age of four.

Training report:

Walk: The picture Hielke 530 presents in walk is a little variable and lacks scope. The walk is decidedly better under saddle than in driven work.

abcde

Trot: The stallion trots with great technique
and lots of bend in the hock. Hielke 530 has
the capacity to achieve self-carriage and
transitions from the hind leg come easy to
him, rising well in the withers and with
good forward reach from the foreleg.

Canter: He has a good-quality canter with fine uphill strides. The stallion canters with great ease and good use of the body.

Riding horse aptitude:

Hielke 530 is very talented for ridden work, he is focused on the rider and has a lot of forward go. In trot he moves with good self-carriage from the hind leg and he is good at transitions. He has an uphill canter with good-quality strides. In ridden work the regularity of the walk is satisfactory, but a bit short.

In-harness aptitude:

Hielke 530 has shown to be very talented for driving and showdriving. He responds well to training, has good balance and a long moment of suspension as well as good bend in the hind leg. His walk is short and vulnerable.

vvaik	6.5
Trot	8.5
Canter	8.5
Balance & posture	8.0
Suppleness	7.5
Transitions	8.5
Impulsion	8.0
Total	87.0

Conclusions Central Examination:

Hielke 530 has a lot of aptitude for riding horse, driving horse and showdriving horse. With his strong hind leg and very good suppleness he is very convincing in trot and canter. His walk needs attention. The stallion is people-oriented, Reliability, hardworking and easy to train.

Dam line:

Hielke 530 comes from mare line 1. His dam is the 12-year-old Hester L.W. Star (Jisse 433 x Tsjerk 328). Her half sister Wilma L.W. Star Pref (Gjalt 426) is the dam of CI Champion Janke L.W. Preliminary Crown (Jehannes 484). Hester is a friendly, people-oriented mare with easy contact manners. She has put eight foals into the world, one every year from the time she was five years old. Three out of the four offspring that could be accepted in the Studbook have been declared Star. One of Hielke 530's half sisters actively competes at Z1 dressage level.

Dam Hester has kept herself well and is in good condition. She has a noble, very expressive head, a long neck, thick tail, satisfactory mane and lavish socks. She has generous, sloping shoulder conformation. Her back should be a little stronger, her loin section has satisfactory width but is a bit weak. Her withers are under-developed and she has a slightly downward build. Hester displays satisfactory durability of legwork. She is a bit standing under in the foreleg, the feet have satisfactory size but are also a bit flat. Her walk is roomy, powerful and regular. She trots correctly and with good rhythm, but she stays a little on the forehand and should show more use of the body.

Final conclusion:

Hielke 530 is a talented stallion who has successfully completed his Central Examination. He is youthful and radiates breed expression. Hielke 530 is a very honest stallion with a fine character. He has lots of forward go and focus. He demonstrates very good movement technique in trot and canter.

Advice for use:

Hielke 530 is a good match for longlined mares with a good walk and satisfactory size. He is expected to improve use of the hind leg in trot as well as suppleness, canter and character.

Hilbert 529

Studbook name: Hylbrand van Swichum **Life number**: 201801223 **Breeder**: J.P. Veenstra **Date of birth**: 22 April 2018 H**eight at withers**: 1.67 metres **Lineage**: Haike 482 x Star Stendert 447 x Star Ielke 382 x Star Pref*4 Folkert 353 x Model Sport Dirk 298 x Star Performance*3 Oepke 266

Pedigree: 32 Kinship: 16.8% (average 17.8%)

Exterior:

Breeding type: Hilbert 529 radiates breed expression. The stallion has satisfactory expression of the head with a long, vertical neck and abundant feathers.

Conformation: Hilbert 529 has horizontal body shape with good shoulder conformation, a strong topline with good connections. The stallion has a long croup with good conformation.

Legwork: Hilbert 529 has satisfactory length in the foreleg. Stance of both foreleg and hind leg is correct. Clean and dry quality of the legwork is satisfactory.

Estimated breeding value exterior:

Reliability	
Breeding type	
Conformation	106
Legwork	
Walk	104

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 2 acceptable

Observations stable manager, riders and drivers:

Hilbert 529 has pleasant contact manners. He has a lot of learning capacity, shows willingness to work and is a nicely trainable horse with a fine mouth.

Central Examination:

Hilbert 529 joined the Central Examination at the age of four.

Training report:

Walk: Hilbert 529's walk has good rhythm and scope and he moves with good use of the body.

Trot: Hilbert 529 trots with satisfactory length of stride presenting good posture and a fine silhouette. He must learn to move with a little more use of the body

abcde

and the hind leg should step more forward under the body with more alacrity.

Canter: Hilbert 529 displays satisfactory technique in canter, with good strides and impulsion.

Riding horse aptitude:

Hilbert 529 has a good mentality and responds well to training. He produces an attractive silhouette and has a natural capacity for self-carriage in trot. The stallion has a good-quality walk and in canter too he demonstrates good-quality movement.

In-harness aptitude:

Hilbert 529 shows the same picture in driven work: a powerful walk, good mentality and trainability. The stallion has little aptitude for showdriving horse.

learning capacity	little				х	much

^{*} during tacking/hitching up, taking temperature etc. ** mental *** physical

Conclusie Central Examination:

Hilbert 529 is talented for riding- and driving horse. What particularly catches the eye are his powerful walk, his good mentality as well as trainability. In trot he must develop more self-carriage, whereas his canter is nicely uphill and with impulsion.

Dam line:

Hilbert 529's dam is the Stendert 447 Star mare Lys van Swichum who died at a young age and who brought a total of four offspring, all of them stallions and all four sired by Haike 482. The two stallions that were inspected were also declared Star. Hilbert 529's lelke 382 Star granddam Sietske Y. van Swichum has in total given eight offspring, with among them the now brand-new stallion dam Lys van Swichum and two Star stallions by Alke 468 and Jehannes 484 respectively.

Next we find the Folkert 353 Star Preferent mare Ylse van Swichum. This mare has produced a total of sixteen offspring, with all offspring that were inspected as adult horses having received the Star predicate. Three mares by lelke 382 and one Haitse 425 mare have been declared Star. This year this 23-year-old Folkert 353 mare gave birth to a Markus 491 colt foal. Next in line is the Dirk 298 Model Sport mare Vemke van de Headammen. This mare has produced eleven offspring but only the previously

mentioned Folkert 353 mare Ylse van Swichum made it to Star.

Final conclusion:

Hilbert 529 is a long-lined, generously developed stallion. He radiates breed expression, has a strong topline and body shape is horizontal. The stallion has pleasant contact manners, is a quick learner and shows willingness to work. Out of the three basic gaits the walk is his strongest asset, with scope, rhythm and good use of the body. In trot he should engage his hind leg with more alacrity. He is talented for riding- and driving horse but less so for showdriving horse.

Advice for use:

Hilbert 529 is a tall, big-framed horse with a good personality. He is expected to improve breeding type and size, but also the walk. With his low kinship he can contribute to more outcrossing within the population of Friesian horses.

Stallion information

november 2022

Hildwin 528

Studbook name: Gijs K. **Life number**: 201800509 **Breeder**: J.A.M. Kruis **Date of birth**: 25 March 2018 **Height at withers**: 1.65 metres **Lineage**: Omer 493 x Star Fridse 423 x Star Tsjerk 328 x Star Pref*7 Oege 267 x Model Pref*9 Reitse 272 x Star Jochem 259 **Pedigree**: 15

Kinship: 17.0 % (average 17.8%)

Exterior:

Breeding type: Hildwin 528 is a stallion with a lot of breed expression and a lot of front. The stallion has a vertical neck that rises a bit deep from the chest. He has a noble head and abundant feathers.

Conformation: Hildwin 528 has a strong build with slightly downhill body shape. His shoulder conformation is somewhat steep but with satisfactory length. He has a strong topline with a long croup which is a little sloping in terms of conformation.

Legwork: The stallion's legwork shows good quality: hard and dry. Hildwin 528 would benefit from a little more length in the foreleg. Stance of the foreleg is also a bit toeing out. Stance of the hind leg is correct. The stallion's feet could be a little bigger.

Estimated breeding value exterior:

Reliability	37-42%
Breeding type	106
Conformation	
Legwork	
Walk	
Trot	104

DNA-testen en Veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 1, acceptable

Observations stable manager, riders and drivers:

Hildwin 528 is a horse with a little bit of a dominant character. The stallion is eager to work, is well-behaved, shows lots of willingness to work and trainability is also good. Hildwin 528 has good contact manners.

Central Examination:

Hildwin 528 completed the Central Examination at the age of four.

Training report:

Walk: The stallion has a regular walk with satisfactory scope and moves with good use of the body.

Trot:In trot Hildwin 528 moves with self-carriage, lots of scope and impulsion. He presents a long moment of suspension, is easy to collect and has an active hind leg.

a b c d e

Canter: In canter he moves with good strides and impulsion, but must learn to move in a more uphill frame. Sometimes the stallion is a little rushed, but this has considerably improved throughout the test.

Riding horse aptitude:

Hildwin 528 has very good natural balance and lots of willingness to work. He is good at transitions, showing active use of the hind leq. The stallion is an all-round utility horse.

In-harness aptitude:

Hildwin 528 is very talented for ridingand driving work but also has the talent for showdriving work. He moves with a great front and good bend in the hind leg, demonstrating a long moment of suspension.

^{*} during tacking/hitching up, taking temperature etc. ** mental *** physical

Conclusie Central Examination:

Hildwin 528 has completed his Central Examination with good results. During his training sessions he demonstrated to be very hardworking with a lot of go and he has shown progress throughout the test, especially in canter.

Dam line:

Hildwin 528's dam is Yasmine K. Star, a 15-year-old fertile mare who at the moment of viewing had her eleventh foal at her side. Besides Hildwin 528 she also brought Bauke K. Star (Fabe 348) who has also taken part in the Central Examination.

The friendly and people-oriented Yasmine K. is still in great condition. She is breed-typical, with a thick tail, satisfactory mane and lavish socks, has satisfactory expression of the head and a long neck of satisfactory length. The mare has a slightly downward build, she could be a little stronger in the back and the shoulder is somewhat steep but with satisfactory length. Her dry legwork shows satisfactory durability, she is a little toeing in and size of the feet is generous. Her walk has satisfactory length of stride, is powerful and regular but she is a little narrow in the forelegs during walk. Her trot displays satisfactory rhythm, is a bit rushed and she

would benefit from better use of the body. Yasmine's granddam is Wilinda K. Star Pref (Oege 267), the dam of KFPS Studbook stallion Wytse 462.

Final conclusion:

Hildwin 528 is a stallion with a strong build who oozes breeding type. It is an all-round stallion with three correct basic gaits and aptitude for all three disciplines. The stallion demonstrates a lot of balance and bend in the hind leg.

Advice for use:

Hildwin 528 can be used for mares with satisfactory length in the foreleg. He is expected to add balance and bend in the hock. The stallion is also expected to improve breed expression and to make a positive contribution towards a cooperative character and a good mentality.

Stallion information

november 2022

Jimte 533

Studbook name: Jurre v.d. Arebo Hoeve **Life number**: 201902094 **Breeder**: R. Arends Date of birth: 19 May 2019 **Height at withers**: 1.67 metres **Lineage**: Ulbrân 502 x Star Epke 474 x Star Nykle 309 x Star Dirk 298 x Star Lammert 260 x Star Ysbrand 238 **Pedigree**: 120

Kinship: 17.5 % (average 17.8%)

Exterior:

Breeding type: Jimte 533 has good breed expression because of his long, vertical neck. The stallion slightly lacks expression of the head. He has lavish mane and a thick tail.

Conformation: Jimte 533 is longlined, youthful and has uphill body frame. He has a correct, well-muscled and closed topline and a long, slightly sloping croup.

Legwork: Jimte 533 has good length in the foreleg and stance is a bit toeing in. The legwork is clean and dry with a slightly sickle-hocked hind leg. The stallion's feet are generously developed.

Estimated breeding value exterior:

Reliability	29-36%
Breeding type	103
Conformation	
Legwork	
Walk	107
Trot	105
Canter	103

DNA testen en Veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 1, acceptable

Observations stable manager, riders and drivers:

Jimte 533 is a pleasant horse to work with and he enjoys all the attention. The stallion is eager to work but needs to develop sharper reactions and he tends to be easily distracted. Once he has found his focus his trainability is good.

Central Examination:

Jimte 533 completed the Central Examination at the age of three.

Training report:

Walk: Jimte 533 shows good rhythm and regularity in walk. He has a ground-covering and powerful stride and his good use of the body catches the eye.

Trot: Jimte 533 displays a roomy, regular trot with good forward reach of the

abcde

foreleg. He must learn to place the hind leg under the body with more activity and bend. This is the reason why the stallion struggles a bit with transitions. Jimte 533 has a satisfactory moment of suspension and use of the body.

Canter: Jimte's canter shows good-quality strides and impulsion, he moves in a satisfactory uphill frame. He should develop more use of the body.

Riding horse aptitude:

Jimte 533 is a pleasing horse who likes working but he can be easily distracted. The stallion shows progress during training and his roomy and regular walk positively catch the eye. In trot the stallion also shows lots of scope and good balance. He should show more capacity for transitions and more active use of the hind leg.

In-harness aptitude:

In driven work Jimte 533 presents a similar picture as under saddle. He possesses a roomy, regular walk. In trot he moves with a long moment of suspension but should be more active from the hind leg. The stallion produces a satisfactory front but does not achieve adequate self-carriage. Jimte has satisfactory aptitude for driving- and showdriving horse.

Walk	/.5
Trot	6.5
Canter	7.0
Balance & posture	7.5
Suppleness	
Transitions	7.0
Impulsion	6.5
Total	77.5

Conclusie Central Examination:

Jimte has satisfactory aptitude for riding-, driving- and showdriving horse. He particularly stands out with his roomy, powerful walk and good use of his body. His trot is roomy with good forward reach in the foreleg, but he needs to develop more activity from the hind leg. He canters in an uphill outline and with impulsion, but needs to improve use of the body.

Dam line:

Jimte's dam is Tekla v.d. Arebo Hoeve Star. She is a well-kept 8-year-old mare who has brought four foals and is a full-time broodmare. Jimte is her second (Star) offspring. She is breed-typical with a satisfactorily noble head and a long, vertical neck, a thick tail and long and abundant mane. Tekla is longlined, has horizontal body shape and could be a little more youthful in appearance. Her

topline is strong, but she is a little tight in the loin section and has short, slightly sloping croup conformation. Her walk is roomy and powerful. The trot has satisfactory length of stride, could be a bit more uphill and the hind leg must be brought further under the body. The mare has a well-behaved, calm and down-to-earth character.

Final conclusion:

Jimte 533 is a longlined, youthful and strong stallion with an uphill build. He is a breed-typical and hardworking stallion who stands out with his regular and roomy walk. The stallion has performed very consistently throughout the Central Examination.

Advice for use:

Jimte 533 is expected to improve rhythm and scope in walk. He can also pass on a good topline and breed expression.

Stallion information

november 2022

Jorke 532

Studbook name: Jorke fan 'e Kamperdyk **Life number**: 201900784 **Breeder**: S.A. de Vries **Date of birth**: 2 April 2019 **Height at withers**: 1.68 metres **Lineage**: Menne 496 x Star AA Tsjalle 454 x Star Felle 422 x Star Djurre 284 x Star Mark 232 x Model Pref*7 Tetman 205

Pedigree: 110 **Kinship:** 18.7 % (average 17.8%)

Exterior:

Breeding type: Jorke 532 has satisfactory breed expression. His head might be a bit more aristocratic but he has lots of length in his neck with satisfactory vertical build. He has satisfactory feathers and a thick tail.

Conformation: Jorke 532 is a big-framed, longlined stallion with uphill body frame. He has a strong topline, the croup has good length and good conformation.

Legwork: Stance of the foreleg is good and with good length. The hind legs are slightly sickle-hocked. Jorke 532 has generously-sized feet and his legwork shows satisfactory quality.

Estimated breeding value exterior:

Reliability	34-39%
Breeding type	
Conformation	
Legwork	
Walk	
Trot	107
Canter	105

DNA tests and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 2 acceptable

Observations stable manager, riders and drivers:

Jorke 532 is a really lovely, affectionate horse to work with. In training he is very pleasing, eager to work, trainability is good and he always keeps giving his best. Jorke 532 is a youthful stallion who is always focused and responsive to aids.

Central Examination:

Jorke 532 completed the Central Examination at the age of three. Because of illness, the stallion joined the test a week later and needed some time for his recovery. Jorke has gone through a positive development and has shown lots of progress in his training.

Training report:

Walk: Jorke 532's walk has good rhythm, satisfactory length of stride and more than satisfactory activity.

abcde

Trot: During the saddle test the stallion was still lacking a bit in strength but the trot had satisfactory scope and rhythm. The stallion strongly improved in the course of the Central Examination and gained strength and stamina. He displays good self-carriage in trot with good use of the foreleg and a nicely engaged hind leg.

Canter: The stallion moves in an uphill canter with lots of scope and impulsion. Jorke 532 is able to close up in the canter and has a lot of capacity for cantering in a closed outline.

Riding horse aptitude:

Jorke 532 is very eager to work, hardworking and focused on the rider, which makes him a joy to ride. The stallion possesses three consistently rhythmic basic gaits, with the canter in particular presenting a very positive picture and great capacity for collection.

In-harness aptitude:

In the driven part of the Central Examination the stallion continued to develop in strength, bend in the hind leg and in capacity for transitions. Jorke 532 also proves to be easy to train in driven work and actively responds to the aids.

Conclusie Central Examination:

In the course of the Performance Test Jorke 532 has developed into an all-round utility horse.

Dam line:

Jorke 532's dam is eleven years old and is used for breeding. Up till now Lobke fan 'e Kamperdyk Star AA has given seven foals, with Jorke being her fifth offspring and her first offspring to become Star. Lobke is in fine condition, youthful appearance is satisfactory and she is satisfactorily longlined. Her head is a bit big and she has expressive eyes. She has a remarkably long neck with a good vertical build. She does not have a lot of feathers. The mare has a somewhat downhill body frame and would benefit from a little more length in the foreleg. Shoulder conformation is sloping with good length. Connections in the back as well as loin section should be stronger. Her legwork shows satisfactory quality and feet are

generous. Her walk displays satisfactory power but needs more scope and should be more regular. The trot is satisfactory with good impulsion and good bend in the hock, but she should move more over the back. Lobke is an alert, sharp and diligent horse who immediately calms down after exercise. For her ABFP in 2014 she scored 79.5 for her saddle test and 79 points for her driving test.

Final conclusion:

Jorke 532 is a big-framed, longlined and breed-typical stallion with uphill body frame. He has shown a lot of progress throughout the test. Jorke has a very pleasing character and has shown to be talented for ridden as well as driven work. The stallion possesses three regular basic gaits with especially the canter positively catching the eye.

Advice for use:

Jorke 532 is expected to pass on uphill body frame and a strong topline with good croup conformation. The stallion stands out with his willing and easy-going character and good mentality.

Stallion information

november 2022

Kanne 534

Studbook name: Kanne fan de Mersken **Life number**: 201902907 **Breeder**: Age Okkema family **Date of birth**: 27 June 2019 Height at withers: 1.64 metres **Lineage**: Ulbrân 502 x Star Sport Perf*3 AA Thorben 466 x Crown Sport Pref*4 Perf*4 Doaitsen 420 x Crown Sport Pref*9 Perf*6 A Fabe 348 x Model Pref*6 Perf*5 Feitse 293 x Star Pref*7 Perf Naen 264 **Pedigree**: 50 **Kinship**: 17.1 % (average: 17.8%)

Exterior:

Breeding type: Kanne 534 radiates breed expression. He has a noble head and a vertical neck with satisfactory length. The stallion has a graceful outline with abundant feathers.

Conformation: The stallion radiates youth and longlined quality is satisfactory.
Kanne has horizontal body shape. He should have more of a closed topline, shoulder conformation is sloping and long and he has a slightly sloping croup.

Legwork: Kanne 534 has dry and clean legwork. The stallion would benefit from a little more length in the foreleg. Stance of the legwork is correct with good angle in the hind leg.

Estimated breeding value exterior:

Reliability	29-36%
Breeding type	107
Conformation	106
Legwork	
Walk	107
Trot	106
Canter	104

DNA tests and veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 1, acceptable

Observations stable manager, riders and drivers:

Kanne 534 has pleasant contact manners, is inquisitive and very intelligent. The stallion is hardworking and has natural balance. He quickly tenses up, is still a bit fidgety in the contact but is easy to train.

Central Examination

Kanne 534 completed the Central Examination at the age of three.

Training report:

Walk: Kanne 534's walk is active, with satisfactory scope and satisfactory rhythm and use of the body. In the walk the stallion should move with more bend in the hock. Movement sequence in the foreleg is correct.

abcde

Trot: Kanne 534 shows good use of the foreleg. The trot has more than satisfactory scope and self-carriage but needs more bend in the hind leg.

Canter: The stallion has lots of talent for canter. Kanne 534 is light-footed, has good-quality strides with good impulsion and transitions come easy to him.

Riding horse aptitude:

Kanne 534 has good aptitude for riding horse, he has forward go and willingness to work. He possesses three good basic gaits, showing good use of the body in all three paces. Because of his strong strides and impulsion the canter positively catches the eye. The stallion must learn to give more to the bit.

In-harness aptitude:

In front of the carriage Kanne 534 shows willingness to work and a lot of forward go. He is a little rushed in walk but remains regular. In trot he demonstrates lots of technique in the foreleg and moves with a fast hind leg, but the hind leg needs to develop more bend. The stallion is good at transitions but he must learn to give a little more to the bit. Kanne 534 has good aptitude for driven work, both as driving- and as showdriving horse.

Test results showdriving test:

Walk	8.0
Trot	7.0
Canter	7.0
Balance & posture	7,5
Suppleness	7.0
Transitions	7.5
Impulsion	7.5
Total	81.5

Conclusie Central Examination:

Kanne 534 has successfully completed his Central Examination. Kanne 534 is a hardworking stallion with a good mentality and good use of the body. Especially eye-catching is his canter under saddle.

Dam line:

Kanne 534's dam is Sterre T. fan 'e Boppelannen Star Sport Performance AA (Thorben 466), a 9-year-old still youthful mare from a predicate-rich dam line. Sterre has scored 80.5 points in her IBOP and has also obtained the Sport predicate in driving. She is now full-time used for breeding. Sterre has given birth to six foals so far, Kanne 534 is her third offspring. Half sister Ela Sterre fan de de Mersken Crown AAA (Jehannes 484) became Champion at the Cl 2022 in the category 4-year- and older mares, as well as Reserve Overall Champion. Dam Sterre became Performance on the basis of her first three offspring and that makes her the fifth

generation Performance mare in this mare line. Kanne's 3rd dam is Els F.T. Crown Sport Preferent Performance (Fabe 348), who is a full sister of Sape 381. Sterre has a well-behaved and quiet character and has kept herself well with correct stance of her dry and clean legwork. Her head might have a little bit more of a noble expression, she is somewhat heavy in the jaw and has a slightly short, vertical neck. Her shoulder is long and sloping, she could be a bit stronger in the topline and her loin section is a fraction weak. Her croup has satisfactory length and good conformation. Sterre's walk is roomy, powerful, regular and she moves well through the body. In trot she moves in a satisfactory uphill outline with satisfactory engagement from the hind leg, but here she should show more use of the back.

Final conclusion:

Kanne 534 is a stallion with a proportionate build with fine proportions and satisfactory length in the neck. He is a hardworking stallion with a good mentality and good use of the body. He demonstrates very good movement technique in canter.

Advice for use:

Kanne 534 kan gebruikt worden om Kanne 534 can be used to improve use of the body and willingness to work, as well as the canter. His mares should be satisfactorily longlined with good toplines.

Stallion information

november 2022

Kees 531

Studbook name: Kees van Raepshille **Life number**: 201900282 **Breeder**: A.G.G. Schrauwen **Date of birth**: 11 March 2019 Height at withers: 1.67 metres **Lineage**: Tjebbe 500 x Crown Sport AAA Maurus 441 x Star Andries 415 x Star Fetse 349 x Star Pref*7 Hearke 254 x Star Pref*4 Hotse 223 **Pedigree**: 22 **Kinship**: 18.2 % (average 17.8%)

Exterior:

Breeding type: Kees 531 is a stallion with great breed expression, thanks to a long, vertical neck, a head with satisfactory noble expression and satisfactory feathers.

Conformation: He is a longlined stallion with uphill body shape and he is slightly longish in the mid-section. Kees 531 would benefit from a slightly more closed topline. He has a long and sloping shoulder as well as a long croup with good conformation.

Legwork: Kees 531 has dry and clean legwork. The feet should be slightly larger.

Estimated breeding value exterior:

Reliability	29-35%
Breeding type	111
Conformation	
Legwork	
Walk	106
Trot	105
Canter	102

DNA testen en Veterinary:

The stallion has met the regulatory requirements with regard to X-ray testing, semen quality and roaring.

Dwarfism:non-carrier statusHydrocephaly:non-carrier statusChestnut factor:non-carrier statusVeterinary:no observationsRoaring:grade 2 acceptable

Observations stable manager, riders and drivers:

Kees 531 has an inquisitive nature and displays true stallion behaviour. Kees has a dominant character. In spite of being easily distracted his trainability is good.

Central Examination:

Kees 531 completed the Central Examination at the age of three. In the course of the test the stallion's presentation started to show more calmness.

Training report:

Walk: Kees 531 has a sound and regular walk, with satisfactory activity and length of stride.

abcde

Trot: The stallion moves in a light-footed, regular trot with good suppleness and use of the body. Kees 531 has good shoulder freedom and moves with active use of the hind leg and he is good at transitions.

Canter: Kees presents an uphill canter with good-quality strides and impulsion. In the course of the training he has developed more strength and has become less boisterous.

Riding horse aptitude:

Kees 531 has a lot of forward go and is very hardworking, but he is easily distracted and then starts to lose focus. This has however, strongly improved in the course of the test. The stallion has three good basic gaits, with an eye-catchingly good canter.

In-harness aptitude:

In front of the carriage the stallion demonstrates lots of front and forward go. Kees 531 has good shoulder freedom and good technique in the foreleg, transitions come easy to him and he has a long moment of suspension.

Walk	8.5
Trot	7.0
Canter	8.0
Balance & posture	7.5
Suppleness	8.0
Transitions	
Impulsion	7.0
Total	84.0

Conclusie Central Examination:

Kees 531 has successfully completed his Central Examination. He has a lot of talent for riding horse, driving horse and showdriving horse. He is eager to work but tends to be easily distracted. Under saddle his good canter catches the eye, in driven work he shows lots of front as well as fine use of the foreleg and a long moment of suspension.

Dam line:

Kees's dam is the 9-year-old Rosa fan 'e Hartstun Crown Sport AAA (Maurus 441). The mare has brought four foals with Kees being her second offspring. Rosa is a longlined mare. She has an expressive head and big eyes. She is very long in the neck, which is a little horizontal and rises slightly deep from the chest. Her shoulder has satisfactory slope, her topline should be a little stronger. Seen

from the front stance of the legwork is correct, her forelegs are slightly standing under, the hind legs are a fraction sickle-hocked. She has satisfactory dry quality of legwork with satisfactory size of feet. Rosa presents an active walk with satisfactory length of stride and rhythm. Her trot has satisfactory scope but she stays a little high in the croup. Rosa is Z2-qualified for dressage and earned 82.5 points for her IBOP with an 8 for walk. Rosa is a well-behaved, calm, friendly mare who is very eager to work.

Final conclusion:

Kees 531 is a longlined stallion with uphill body frame and he is a little longish in the mid-section. The stallion has a lot of go as well as suppleness. He demonstrates good movement technique in trot and canter. In the work the stallion tends to be easily distracted, but he shows good reaction to the aids.

Advice for use:

Kees 531 is expected to improve length of frame with correct croup length and croup conformation. He can also improve canter and capacity for transitions.

Menne 496

Date of birth: 17 March 2012 Breeder: A. de Hoek, Dr. Compagnie

Owner: Tsjalling de Boer and Hoekstra family, c/o Sintjohannesga

Lineage: Norbert 444 x Star Pref*5 AAA Beart 411 x Star Pref*4 Nykle 309 x Star Pref*5 Perf Tsjalling 235 (pedigree 28)

Kinship: 18.8% Particulars: none

General

Menne 496 was approved at the age of four in the autumn of 2016 on the basis of his very good exterior, good aptitude for dressage and driving and more than satisfactory aptitude for showdriving. He stems from a predicate-rich dam line and was described as an all-round horse. From his first stud season 78 foals were registered, with 90% born out of (at minimum) Star mares. Menne 496 completed his Progeny Test in 2022 based on two year collections of 3-year-old offspring.

Exterior

The Menne 496 offspring are a uniform group of well-developed horses with remarkably strong builds. They would benefit from a bit more youthfulness and class. The offspring are rather short on feathers and expression of the head and therefore lack breed expression. They have long necks but these should have a more vertical build. The offspring have uphill body conformation, good length in

the foreleg, a strong to tight topline and horizontal croup conformation. The horses have good-quality legwork and correct stance of the legwork. The pasterns are long and the feet are large. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Menne 496 offspring have pleasant and calm stable manners and are inquisitive as well as relaxed horses when being handled. They are happy and reliable horses in the work with great zest for work and they are very responsive to the aids. They have good stamina.

Movement/Performance

When presented in-hand the Menne 496 offspring show a rhythmic, powerful walk with satisfactory ground-coverage. They have a very roomy trot with strong use of the hind leg and lots of balance and suppleness. From the Menne 496 offspring 21 individuals have taken part in ABFP

Tests. They show average performances under saddle as well as in driven work. One of his offspring acquired a triple A score. Across the board, the offspring have three more than satisfactory basic gaits and more than satisfactory posture. Some of them lack a bit of rhythm in the walk. In trot they demonstrate lots of action in the legs. The horses respond well to training. They need to develop more capacity for transitions

Conclusion

Menne 496 has a more than satisfactory profile for exterior (Star% 47) with a strong influence on improving conformation and legwork. Menne 496 needs mares with a lot of breed expression. His offspring demonstrate to have good characters both in the stable as well as in the work. As sport horses they have three correct basic gaits, good trainability and demonstrate more than satisfactory aptitude. Based on the overall hereditary profile Menne 496's stud license will be sustained.

Rommert 498

Date of birth: 22 April 2013 Breeder: P. Okkema, Witmarsum Owner: P. Okkema, Witmarsum

Lineage: Norbert 444 x Star Pref*4 Jasper 366 x Star Oege 267 x Star Pref*4 Naen 264 (pedigree 70)

Kinship: 18.5% Particulars: none

General

Rommert 498 was approved at the age of 3 in the autumn of 2016 on the basis of his good lineage, a good exterior and aptitude for all three disciplines. From his first stud season 75 foals were registered, with 76% born out of (at minimum) Star mares. Rommert 498 completed his Progeny Test in 2022 based on two year collections of mainly 3-year-old offspring.

Exterior

The Rommert 498 offspring are a group of satisfactorily uniform horses with good size at withers and strong movement. Many have a downward build but with satisfactory youthful expression. Because of their horizontal neck conformation and little feathers they lack breeding type. The heads should be more aristocratic, head-neck connection is satisfactorily light and length of the necks is satisfactory. Body shape is quite downhill. Strength of the back and loin section is satisfactory. The

croup has satisfactory length and has average (so slightly sloping) conformation. The foreleg is slightly standing-under and the hind leg generally has correct stance. Dry quality of the legwork is satisfactory. Stance of the foreleg is correct, For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Rommert 498 offspring have pleasant and calm stable manners and are relaxed horses when being handled. In the work the horses are very reliable and respond well to training. They are very responsive to the aids, are happy when working and are very eager to work.

Movement/Performance

When presented in-hand the Rommert 498 offspring have satisfactory scope and power in the walk. The horses trot with good bend in the hock but need to develop a more uphill outline. From

the Rommert 498 offspring 20 individuals have taken part in ABFP Tests. They show average performances under saddle as well as in driven work. One of his offspring acquired a triple A score. The horses present a somewhat variable picture. Across the board they need to develop more self-carriage.

Conclusion

Rommert 498 has a more than satisfactory hereditary profile for exterior (Star% is 47). Rommert 498 is best paired to mares with an uphill build and lots of breed expression. His offspring show exemplary stable manners and are very reliable and happy horses in the work. In the aptitude tests they score average results. Based on the overall hereditary profile Rommert 498's stud license will be sustained.

Tiede 501

Date of birth: 6 April 2014 Breeder: Johan Onderdijk, Zwolle Owner: Stud farm Bommelsteijn, Joure

Lineage: Alwin 469 x Star Pref*4 Loadewyk 431 x Star Pref*4 Teunis 332 x Star Pref*5 Feitse 293 (pedigree 8)

Kinship: 18.7% Particulars: none

General

Tiede 501 was approved at the age of three in the autumn of 2017 on the basis of his good lineage, very good exterior, lots of aptitude for dressage and driving and more than satisfactory aptitude for showdriving. From his first stud season 135 foals were registered, with 90% born out of (at minimum) Star mares. Tiede 501 completed his Progeny Test in 2022 based on one year collection of 3-year-old offspring.

Exterior

The Tiede 501 offspring are a very uniform group with more than satisfactory development and remarkably correct exteriors. They are modern, longlined horses with satisfactory youthful expression. They show very good breed expression with aristocratic heads, light head-neck connections, long, vertical necks and more than satisfactory feathers. They have very correct conformation with striking uphill body shape and strong toplines.

They have sloping shoulder conformation, slightly tight backs, strong loin section and good croup conformation with satisfactory length in the croup. They have clean legwork and correct stance of legwork seen from the side. Stance of the foreleg is generally correct, occasionally slightly toeingout. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Tiede 501 offspring have pleasant and calm stable manners and are people-friendly. Trainability in the work is more than satisfactory. They have good willingness to work but should show a little more perseverance and stamina.

Movement/Performance

When presented in-hand the Tiede 501 offspring demonstrate a roomy, rhythmic and powerful walk. They trot with lots of scope, balance and

suppleness and good use of the hind leg. From the Tiede 501 offspring 23 individuals have taken part in ABFP Tests. They show above-average performances under saddle as well as in driven work. Four offspring have achieved a triple A score. The walk is above average. The trot shows satisfactory scope and is light-footed and active. Only one or two individuals lack moment of suspension. In canter many are still struggling with balance.

Conclusion

Tiede 501 displays an extraordinarily high all-round hereditary profile (Star% 67 with a large part first-premium mares) and an above-average test result. In terms of character the offspring also make a good impression. Based on the positive profile as described above, Tiede 501 is approved on offspring.

Tymen 503

Date of birth: 9 May 2014

Breeder: G.G.F. van Dijkhuizen, Oosterzee

Owner: Van Manen Brothers & H. Eppinga, c/o Ede

Lineage: Tsjalle 454 x Crown Sport A Harmen 424 x Star Pref*5 Perf Sape 381 x Star Pref*4 Brandus 345 (pedigree 70)

Kinship: 18.9% Particulars: none

General

Tymen 503 was approved at the age of three in the autumn of 2017 on the basis of a good exterior and a good performance as well as a good dam line that has brought forth several approved stallions. From his first stud season 164 foals were registered, with 84% born out of (at minimum) Star mares. Tymen 503 completed his Progeny Test in 2022 based on one year collection of 3-year-old offspring.

Exterior

The Tymen 503 offspring are a satisfactorily uniform group of averagely-developed horses. They are breed-typical and youthful. The offspring have aristocratic heads, light head-neck connections, satisfactory length of neck and vertical neck conformation. They are slightly short on feathers. In terms of body shape they have a somewhat downward build. The topline has satisfactory strength. Conformation of the croup is good, but short. The horses have good-quality

legwork. Stance of the hind leg is sickle-hocked. We occasionally see hard curbs. Stance of the foreleg has a slight tendency towards toeing-out. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Tymen 503 offspring have pleasant and calm stable manners and easy contact manners. Reliability and sensitivity in the work are satisfactory and they are not prone to building up tension. Trainability is more than satisfactory and they display lots of perseverance.

Movement/Performance

When presented in-hand the Tymen 503 offspring demonstrate satisfactory activity and rhythm in the walk but in many cases they need to develop more length of stride. In trot however, they do demonstrate lots of scope and they place the hind leg under the body with satisfactory bend and alacrity, showing

lots of balance and suppleness. From the Tymen 503 offspring 20 individuals have taken part in ABFP Tests. They show average performances both under saddle as well as in driven work, with slightly higher scores in the ridden part than in the driven part. Two offspring have achieved a triple A score. In the tests too the walk is active but the horses need to develop more scope and sometimes also more rhythm. The trot is active showing satisfactory posture but quite frequently the rhythm is high. In canter they present satisfactory posture but are still lacking a bit of self-carriage. The horses show satisfactory capacity for transitions.

Conclusion

Tymen 503 shows a good hereditary profile for exterior (Star% 51) and a satisfactory test result. The offspring have pleasing characters and demonstrate a lot of perseverance. Based on the hereditary profile as described above, Tymen 503's stud license will be sustained.

Ulbrân 502

Date of birth: 7 April 2014 Breeder: J. Mulder, Waskemeer

Owner: Age Okkema family, Siegerswoude

Lineage: Reinder 452 x Star Jakob 302 x Model Pref*6 Perf AAA Rypke 321 x Model Pref*4 Lute 304 (pedigree 115)

Kinship: 17.4% Particulars: none

General

Ulbrân 502 was approved as a 3-year-old stallion in the autumn of 2017 on the basis of his more than satisfactory lineage, a good exterior with more than satisfactory breed expression and very good performances in all three disciplines. From his first stud season 93 foals were registered, with 80% born out of (at minimum) Star mares. Ulbrân 502 completed his Progeny Test in 2022 based on one year collection of 3-year-old offspring.

Exterior

The Ulbrân 502 offspring are a uniform group of generously developed horses with lots of breed expression. They are longlined but some would benefit from a little more youthfulness. The horses score well on breed characteristics: they have noble heads, light head-neck connections, much length in the necks, satisfactory vertical neck conformation and more than satisfactory feathers. They have uphill builds and good length in the

foreleg. They have satisfactory strength in the back but the loin section should be stronger. The croup has the desired conformation and satisfactory length. The legwork shows satisfactory quality. Quite often the hind leg is sickle-hocked and we frequently see toeing-in of the foreleg. The horses have long pasterns and generous size of feet. For a more detailed description of the exterior please consult the breeding values for exterior.

Character/Training report

The Ulbrân 502 offspring show exemplary behaviour in the yard and are relaxed when handled. They are easy to train and give good reaction to the aids. They have good work ethics but need to develop a little more stamina.

Movement/Performance

When presented in-hand the Ulbrân 502 offspring have a roomy, rhythmic and powerful walk. The trot is also roomy with satisfactory power and lots of

balance and suppleness. From the Ulbrân 502 offspring 21 individuals have taken part in ABFP Tests. They show exceptionally good performances under saddle as well as in driven work. Seven offspring have achieved a triple A score. In the tests the horses move well with satisfactory rhythm and scope. In trot they demonstrate good posture with balance and self-carriage, although some individuals tend to lose the engagement from the hind leg. The canter is spacious with good-quality-strides. The horses show remarkably good capacity for transitions, suppleness and impulsion. They also score above average on showdriving aptitude.

Conclusion

Ulbrân 502 shows a strong hereditary profile for exterior (Star% 64) and an exceptionally high test result. In terms of character the offspring also make a good impression. Based on the positive profile as described above, Ulbrân 502 is approved on offspring.

Stallion family-tree KFPS-studbook stallions | December 2022

In this overview the KFPS-studbook stallions are displayed in 4 studs lines:

Age, Ritske, Jarich and Mark. The outline only include the stallions

that currently have a covering license or in the direct male line of an active Stallion arise or are the maternal grand dam of an active studbook Stallion. In parentheses the Mareline from which a Stallion results is displayed as well as the maternal grand dam and the maternal great grand dam. The current, living and available studbook stallions are indicated in blue.
